

POLARIS GLOBAL VALUE FUND

Total Net Assets \$408 Million
Nasdaq Symbol PGVFX
CUSIP 349903484
Inception Date 7/31/89
Expense Ratio (Gross) 1.27%
Expense Ratio (Net) 0.99%

The Fund's annual operating expense ratio has been reduced to 0.99%, effective as of January 1, 2014 through April 30, 2018, due to the Adviser's contractual agreement to waive its fee and/or reimburse expenses to limit Total Annual Fund Operating Expenses.

Risk Measures

PGVFX vs. MSCI World Index

Treynor Measure	8.36
Beta	0.93
Alpha	3.06
Sharpe Ratio	0.48

Data since inception of the Polaris Global Value Fund has been used in calculating the above numbers.

PERFORMANCE AS OF MARCH 31, 2017 (Total Return)

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. For the most recent month end performance, please call (888) 263-5594. Shares redeemed or exchanged within 180 days of purchase will be charged a 1.00% fee. Fund returns for periods less than 180 days do not reflect this fee; otherwise, if reflected this return would have been lower. Returns greater than one year are annualized.

HYPOTHETICAL GROWTH OF \$10,000 7/31/89-3/31/17

Growth of a hypothetical \$10,000 investment compared to the MSCI World Index

Past performance is no guarantee of future results. Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.

PERFORMANCE COMMENTARY

Although lagging the MSCI World Index, the Fund posted positive absolute returns attributable to gains in the majority of holdings. Samsung Electronics was up more than 25%, after reporting strong quarterly results backed by rising prices and volumes for semiconductor chips and TV panels. Asahi Group Holdings had double-digit gains after beating fourth quarter earnings expectations and introducing plans to increase its overseas business. British homebuilders, Taylor Wimpey, Persimmon and Barratt Developments, were in positive territory. Steady demand, mortgage availability and affordability, along with the U.K. government's help-to-buy scheme, may continue to support growth in this industry. Better-than-expected economic developments in Asia and China helped stabilize prices in the materials sector, benefiting Showa Denko, Imerys and Methanex. The Fund's non-U.S. banks, largely targeted to a burgeoning Asian customer base, topped financial sector performance. U.S. banks lost momentum, as lighter federal regulations and lower taxes have yet to materialize under the new Administration. In the energy sector, WorleyParsons was up after it received a tendered bid by Dubai-based engineering firm, Dar Group. Thai Oil's quarterly earnings topped analyst expectations, as the oil refiner capitalized on supply-demand constraints to exact greater product sales and volumes.

Detractors were mainly relegated to the telecom industry, with declines from Frontier Communications and Verizon Communications, select U.S. banking institutions and website services provider, Web.com. International Game Technology was down after releasing decent full year earnings, but revising 2017 guidance lower. Teva Pharmaceutical trimmed its 2017 profit forecast amid an unanticipated slowdown in its introduction of generic medicines. Finnish building construction company, YIT Oyj, dropped on slower sales in the Russian housing market.

Positive forecasts from the world's largest two economies, the U.S. and China, have created market optimism. However, headwinds still exist, due to a tepid European economy potentially impacted by several crucial elections on the horizon. We keep all of these issues in mind, while remaining focused on fundamental, bottom-up stock picking.

THE POLARIS GLOBAL VALUE FUND is a no-load mutual fund that seeks capital appreciation by investing in value stocks worldwide. The Fund is diversified across country, sector and market capitalization, and typically holds 65 to 100 stocks that meet Polaris' strict value criteria.

Polaris Capital Management, LLC (the "Adviser") uses proprietary investment technology combined with Graham & Dodd style fundamental research to identify potential investments. Filters are applied as part of the investment approach, which attempts to identify a list of companies with the most undervalued streams of sustainable free cash flow or assets worldwide. Polaris then conducts rigorous fundamental research on the companies identified in the screening process, subsequently making selections for Fund investment.

THE INVESTMENT ADVISER

Polaris Capital Management, LLC is a global value equity manager that provides investment services for institutional and individual clients. Polaris' management believes worldwide markets are generally efficient over time, but investor behavior creates volatility that leads to inefficiency somewhere in the world. An integrated global investment strategy may be utilized to help exploit this inefficiency. Polaris believes investing in the most undervalued companies worldwide likely limits risk and has the potential for benchmark-beating returns.

Total return includes reinvestment of dividends and capital gains. During the period some of the Fund's fees were waived or expenses reimbursed. In the absence of these waivers and reimbursements, performance figures would be lower. **The Fund invests in securities of foreign issuers, including issuers located in countries with emerging capital markets. Investments in such securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. Options trading involves risk and is not suitable for all investors.** On June 1, 1998, a limited partnership managed by the Adviser reorganized into the Fund. The predecessor limited partnership maintained an investment objective and investment policies that were, in all material respects, equivalent to those of the Fund. The Fund's performance for periods before June 1, 1998, is that of the limited partnership and includes the expenses of the limited partnership. If the limited partnership's performance had been readjusted to reflect the first year expenses of the Fund, the Fund's performance for the periods prior to June 1, 1998, may have been lower. The limited partnership was not registered under the Investment Company Act of 1940 ("1940 Act") and was not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the Internal Revenue Code, which, if applicable, may have adversely affected its performance.

The MSCI World Index, net dividends reinvested measures the performance of a diverse range of global stock markets in the United States, Canada, Europe, Australia, New Zealand and the Far East. The MSCI World Index is unmanaged and does include the reinvestment of dividends, net of withholding taxes. One cannot invest directly in an index or an average.

The Treynor Measure is a risk-adjusted measure of return that divides a portfolio's return in excess of the riskless return by its beta. Beta is the measure of a fund's relative volatility as compared to an index. A fund with a beta higher than 1 is expected to be more volatile than the applicable index. Alpha is the difference between a fund's actual returns and its expected performance given its level of risk as measured by beta. The Sharpe Ratio is a measure of the risk-adjusted return of an investment.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses.
