This Statement of Additional Information (the “SAI”) supplements the prospectus dated May 1, 2025, as it may be amended from time to time (the “Prospectus”), offering shares of the Polaris Global Value Fund (the “Fund”), a separate series of Forum Funds (the “Trust”). This SAI is not a prospectus and should only be read in conjunction with the Prospectus. You may obtain the Prospectus without charge by contacting Atlantic Fund Administration, LLC (d/b/a Apex Fund Services) (“Apex Fund Services”, “Apex” or “Administrator”), a wholly owned subsidiary of Apex US Holdings LLC, at the address, telephone number or e-mail address listed above. You may also obtain the Prospectus on the Fund’s website listed above. This SAI is incorporated by reference into the Fund’s Prospectus. In other words, it is legally a part of the Prospectus.

Financial statements for the Fund for the year ended December 31, 2024 are included in the Fund’s Form N-CSR and are incorporated into this SAI by reference. Copies of the Fund’s Annual Report and Semi-Annual Report may be obtained without charge and upon request, by contacting Apex Fund Services at the address, telephone number or e-mail address listed above. You may also obtain copies of the Fund’s most recent Annual Report and Semi-Annual Report on the Fund’s website listed above.

## KEY DEFINED TERMS

---

As used in this SAI, the following terms have the meanings listed.

“1933 Act” means the Securities Act of 1933, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“Adviser” means Polaris Capital Management, LLC, the Fund's investment adviser.

“Board” means the Board of Trustees of the Trust.

“Independent Trustees” means trustees who are not interested persons of the Trust, as defined in Section 2(a)(19) of the 1940 Act.

“IRC” means the Internal Revenue Code of 1986, as amended.

“IRS” means the Internal Revenue Service.

“NAV” means net asset value per share.

“RIC” means a domestic corporation qualified as a “regulated investment company” (as defined in Subchapter M of Chapter 1, Subtitle A, of the IRC).

“SEC” means the U.S. Securities and Exchange Commission.

## INVESTMENT POLICIES AND RISKS

---

The Fund is a diversified open-ended series of the Trust. This section supplements, and should be read in conjunction with, the Prospectus. The following are descriptions of the investments and investment practices that the Fund may pursue (in addition to those described in the Prospectus) and the associated risks. Please see the Prospectus for a discussion of the Fund's investment objective, principal investment strategies and principal risks.

### A. Security Ratings Information

The Fund's investments in fixed-income, preferred stock and convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities. The Fund may invest in investment grade securities and non-investment grade securities. Investment grade means rated in the top four long-term rating categories or unrated and determined by the Adviser to be of comparable quality.

The lowest ratings that are investment grade for corporate bonds, including convertible securities, are "Baa" in the case of Moody's Investors Service, Inc. ("Moody's") and "BBB" in the cases of Standard & Poor's Financial Services, LLC, a division of the McGraw-Hill Companies, Inc. ("S&P") and Fitch, Inc. ("Fitch"); for preferred stock the lowest ratings are "Baa" in the case of Moody's and "BBB" in the cases of S&P and Fitch. Non-investment grade fixed-income securities (commonly known as "junk bonds") are inherently speculative and generally involve greater volatility of price than investment grade securities. Unrated securities may not be as actively traded as rated securities. The Fund may retain securities whose ratings have declined below the lowest permissible rating category (or that are unrated and determined by the Adviser to be of comparable quality to securities whose ratings have declined below the lowest permissible rating category) if the Adviser determines that retaining such security is in the best interests of the Fund.

Moody's, S&P, Fitch and other organizations, together known as Nationally Recognized Statistical Rating Organizations ("NRSROs"), provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities is included in Appendix A to this SAI. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. An issuer's current financial condition may be better or worse than a rating indicates.

### B. Equity Securities

**Equity Securities.** Equity securities in which the Fund may invest include common stocks, preferred stocks, convertible securities, warrants, rights and depositary receipts. Common stocks are the most familiar type of equity security. Common stocks generally represent the riskiest investment in a company. Different types of equity securities provide different voting and dividend rights and priority in the event of the bankruptcy and/or insolvency of a company.

Common stocks and preferred stocks represent shares of ownership in a company. Preferred stocks usually have specific dividends and rank after bonds and before common stock in claims on assets of the corporation should it be dissolved. Increases and decreases in earnings are usually reflected in a company's stock price. Convertible securities are debt or preferred equity securities convertible into common stock. Usually, convertible securities pay dividends or interest at rates higher than common stock, but lower than other securities. Convertible securities usually participate to some extent in the appreciation or depreciation of the underlying stock into which they are convertible. Depositary receipts typically are issued by banks or trust companies and evidence ownership of underlying equity securities. Warrants are options to buy a stated number of shares of common stock at a specified price anytime during the life of the warrants.

While past performance does not guarantee future results, equity securities historically have provided the greatest long-term growth potential of an investment in a company. However, stock markets are volatile, and the value of securities held by the Fund will be affected by changes in the company's financial condition, economic and political conditions, and the stock markets, which may be the result of domestic or international political or economic news, changes in interest rates or changing investor sentiment. Other factors may also affect a particular stock's prices, such as poor earnings reports by an issuer, loss of major customers, major litigation against an issuer, or changes in governmental regulations affecting an industry. The equity securities of smaller companies are more sensitive to these changes than those of larger companies. The Fund may experience a substantial or complete loss on an equity investment.

**Warrants and Rights.** Warrants are securities permitting, but not obligating, their holder to subscribe for other securities or commodities and provide the Fund with the right to purchase at a later date other securities of the issuer. Rights are similar to warrants but typically are issued by a company to existing holders of its stock and provide those holders the right to purchase additional shares of stock at a later date. Rights also normally have a shorter duration than warrants.

Warrants and rights do not carry with them the right to dividends or voting rights with respect to the securities that they entitle their holder to purchase, and they do not represent any rights in the assets of the issuer. Warrants and rights may be more speculative than certain other types of investments and entail risks that are not associated with a similar investment in a traditional equity instrument.

The Fund will limit its purchases of warrants to not more than 5% of the value of its net assets. The Fund may also invest up to 5% of its net assets in stock rights.

Investments in warrants and rights also involve certain risks, including the possible lack of a liquid market for the resale of the warrants and rights, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant or right is not exercised within the specified time period, it becomes worthless.

**Depository Receipts.** Depository receipts represent ownership interests in securities of foreign companies (an “underlying issuer”) that have been deposited with a bank or trust and that trade on an exchange or over-the-counter. Depository receipts are not necessarily denominated in the same currency as the underlying securities. Depository receipts include American Depository Receipts (“ADRs”), European Depository Receipts (“EDRs”), and Global Depository Receipts (“GDRs”), among other instruments. Depository receipts involve many of the same risks of investing directly in foreign securities, including currency risks and risks of foreign investing.

Depository receipts may be sponsored or unsponsored. Unsponsored depository receipts may be created without the participation of the foreign issuer. Holders of these receipts generally bear all the costs of the depository receipt facility, whereas foreign issuers typically bear certain costs in a sponsored depository receipt. Further, issuers of securities underlying unsponsored depository receipts have no obligation to disclose material information in the U.S. Accordingly, available information concerning such an issuer may not be current, and the prices of unsponsored depository receipts may be more volatile than the prices of sponsored depository receipts.

ADRs typically are issued by a United States of America (“U.S.”) bank or trust company, evidence ownership of underlying securities issued by a foreign company, and are designed for use in the U.S. securities markets. Most ADRs are denominated in U.S. dollars and are traded on a U.S. stock exchange. However, they are subject to the risk of fluctuation in the currency exchange rate if, as is often the case, the underlying securities are denominated in foreign currency. Also, the securities underlying ADRs typically trade on foreign exchanges at times when the U.S. markets are not open for trading. As a result, the value of ADRs representing those underlying securities may change materially at times when the U.S. markets are not open for trading.

EDRs are receipts issued by European financial institutions. They are often denominated in a foreign currency and typically trade in Europe. GDRs are receipts issued by either a U.S. or non-U.S. banking institution evidencing its ownership of the underlying foreign securities and are often denominated in U.S. dollars. IDR are receipts typically issued by a foreign bank or trust company evidencing its ownership of the underlying foreign securities.

The Fund will not invest in any depository receipts that the Adviser deems to be illiquid or for which pricing information is not readily available.

**Real Estate Investment Trusts and Royalty Trusts.** The Fund may purchase interests in real estate investment trusts (“REITs”) and royalty trusts. A REIT is a company that pools investor funds to invest primarily in income producing real estate or real estate related loans or interests. A royalty trust is an entity that typically owns oil or natural gas wells or the mineral rights of wells and of property, such as mines.

Because REITs and royalty trusts have ongoing fees and expenses, which may include management, operating and administration expenses, REIT and royalty trust shareholders, including the Fund, will indirectly bear a proportionate share of those expenses in addition to the expenses of the Fund. However, such expenses are not considered to be Acquired Fund Fees and Expenses and, therefore, are not reflected as such in the Fund’s fee table.

REITs may be affected by changes in their underlying properties and by defaults by borrowers or tenants. Mortgage REITs may be affected by the quality of the credit extended. Furthermore, REITs are dependent on specialized management skills. Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flow to make distributions to shareholders or unitholders, and may be subject to defaults by borrowers and to self-liquidations. REITs are not taxed on income distributed to their shareholders if, among other things, they distribute substantially all of their taxable income (other than net capital gains) for each taxable year. The performance of a REIT would likely be affected by its failure to qualify for tax-free pass-through of

income under the IRC, however, including regulations thereunder and IRS interpretations or similar authority upon which the Fund may rely or its failure to maintain exemption from registration under the 1940 Act.

Royalty trusts may be subject to certain risks associated with a decline in demand for crude oil, natural gas and refined petroleum products, which, in turn, could adversely affect income and royalty trust revenues and cash flows. Factors that could lead to a decrease in market demand include a recession or other adverse economic conditions, an increase in the market price of the underlying commodity, higher taxes or other regulatory actions that increase costs, or a shift in consumer demand for such products. A rising interest rate environment could adversely impact the performance of royalty trusts. Rising interest rates could limit the capital appreciation of royalty trusts because of the increased availability of alternative investments at more competitive yields.

### C. Fixed-Income Securities

**General Risks.** The Fund may invest in various types of fixed-income securities. Fixed income securities are also known as “debt securities.” Examples of fixed income securities include, but are not limited to, U.S. Government Securities, corporate debt obligations, mortgage-related and asset-backed securities, and variable and floating rate securities. Yields on fixed income securities depend on a variety of factors, including the general conditions of the fixed-income securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue.

Fixed income securities are subject to the risk of an issuer’s inability to meet principal and interest payments on its obligations (“credit risk”) and are subject to price volatility due to such factors as interest rate sensitivity (“interest rate risk”), market perception of the creditworthiness of the issuer, and market liquidity (“market risk”). Because changes in the ability of an issuer to make payments of interest and principal and in the markets’ perception of an issuer’s creditworthiness will affect the market value of that issuer’s debt securities, an investment in fixed income securities is subject to risk even if they are paid in full at maturity. As a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Interest rates impact the value of fixed income securities. The value of fixed income investments is likely to decline in times of rising market interest rates. Conversely, the value of fixed income investments is likely to rise in times of declining market interest rates. Typically, the longer the time to maturity of a given security, the greater is the change in its value in response to a change in interest rates. Foreign debt securities are subject to these risks and to risks similar to those of other foreign securities.

*Credit Risk.* The financial condition of an issuer of a fixed income security may cause it to default on interest or principal payments due. The risk presented by the financial condition of a fixed income security’s issuer is referred to as credit risk. Lower-rated securities are subject to greater credit risk than more highly rated securities because their prices are more likely to react to market and credit developments than are more highly rated securities, which react primarily to changes in interest rates. Lower-rated securities are also known as “high yield securities” and/or “junk bonds.” Although such securities tend to provide less protection for payment of principal and interest because they present a greater risk of default and decline due to changes in the issuers’ creditworthiness than do higher quality securities, they may have greater potential for capital appreciation than do higher quality securities. The market for these securities may be thinner and less active than that for higher quality securities, which may affect the price at which the lower rated securities can be sold. In addition, their market prices may fluctuate more than those of higher quality securities and may decline significantly in periods of general economic difficulty or rising interest rates. Accordingly, they may be difficult to value accurately and their valuation may rely more heavily on the judgment of the Adviser than higher quality securities.

Moody’s, S&P’s and other organization providing ratings are private services that provide ratings of the credit quality of fixed income securities. To limit credit risk, the Fund intends generally buy debt securities that are rated by an organization providing ratings in the top four long-term rating categories or in the top two short-term rating categories. A description of the range of ratings assigned to various types of securities is included in Appendix A. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. Consequently, similar securities with the same rating may have different market prices. In addition, rating agencies may fail to make timely changes in credit ratings and the issuer’s current financial condition may be better or worse than a rating indicates. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are not, however, absolute standards of quality; and the Fund may purchase unrated securities if the Adviser determines that the security is of comparable quality to a rated security that the Fund may purchase. In addition, the Fund may retain a security that ceases to be rated or whose rating has been lowered below the Fund’s lowest permissible rating category if the Adviser determines that retaining the security is in the best interests of the Fund. Because a downgrade often reduces the market price of a fixed income security, holding such a security may result in a loss. Unrated securities may not be as actively traded as rated securities.

*Interest Rate Risk.* The market value of interest-bearing fixed-income securities will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity (and duration) of a security, the more sensitive the security is to changes in interest rates. All fixed-income securities can change in value when there is a change in interest rates. In addition, certain fixed-income securities may be subject to prepayment and/or extension risk, which refers to the risk, respectively, that the issuer repays the principal early (in a declining interest rate environment) and/or extends the payment period (in a rising interest rate environment) and, in so doing, reduces the value of the security to securityholders.

**U.S. Government and Agency Securities.** “U.S. Government Securities” are obligations of the U.S. Treasury Department backed by the full faith and credit of the United States. During times of market turbulence, investors may turn to the safety of securities issued or guaranteed by the U.S. Treasury Department, causing the prices of these securities to rise and their yields to decline.

“U.S. Government Agency Securities” are issued or guaranteed by U.S. Government agencies or by instrumentalities of the U.S. Government, such as Ginnie Mae (also known as the Government National Mortgage Association), Fannie Mae (also known as the Federal National Mortgage Association), Freddie Mac (also known as the Federal Home Loan Mortgage Corporation), SLM Corporation (formerly, the Student Loan Marketing Association) (commonly known as “Sallie Mae”), Federal Home Loan Banks (“FHLB”), and the Tennessee Valley Authority. Some U.S. Government Agency Securities are supported by the full faith and credit of the United States, while others may be supported by the issuer’s ability to borrow from the U.S. Treasury Department, subject to the U.S. Treasury Department’s discretion, or only by the credit of the issuer. Accordingly, there is generally considered to be a greater possibility of default than by the U.S. Treasury Department on U.S. Government Securities. The market prices of U.S. Government Agency Securities generally fluctuate inversely with interest rates, declining in rising rate environments and increasing in declining rate environments.

U.S. Government Agency Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. Government, its agencies, authorities or instrumentalities and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. The secondary market for certain of these participations is extremely limited. In the absence of a suitable secondary market, such participations may therefore be regarded as illiquid.

A Fund may invest in separately traded principal and interest components of securities issued or guaranteed by the U.S. Treasury Department. The principal and interest components of selected securities are traded independently under the Separate Trading of Registered Interest and Principal of Securities (“STRIPS”) program. Under the STRIPS program, the principal and interest components are individually numbered and separately issued by the U.S. Treasury Department at the request of depository financial institutions, which then trade the component parts independently. The market prices of STRIPS generally are more volatile than that of U.S. Treasury Department bills with comparable maturities.

**Corporate Debt Obligations.** The Fund may invest in corporate debt obligations. Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. Companies use these instruments to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must repay the amount borrowed at maturity.

Commercial paper is a short-term debt security issued by a corporation, bank, municipality, or other issuer, usually for purposes such as financing current operations. Corporate debt securities registered and sold in the U.S. by foreign issuers are referred to as “Yankee bonds,” and those sold outside the U.S. by foreign or U.S. issuers are referred to as Eurobonds. Commercial paper normally has a maturity of less than nine (9) months. A Fund may invest in commercial paper that cannot be resold to the public without an effective registration statement under the 1933 Act. While some restricted commercial paper normally is deemed illiquid, the Manager may in certain cases determine that such paper is liquid.

**High Yield Securities (Junk Bonds).** The Fund may invest in lower-rated (non-investment grade) debt securities, which are also called “high yield securities” and “junk bonds.” Such securities have a lower credit rating (“Ca” or lower by Moody’s or “CC” or lower (as low as D) by S&P) at the time of investment or, if unrated are determined to be of comparable quality by the Adviser. Securities rated below investment grade are often considered to be speculative. These securities have poor protection with respect to the issuer’s capacity to pay interest and repay principal. Lower-rated debt securities generally offer a higher current yield than that available for investment grade issues with similar maturities, but they may involve significant risk under adverse conditions. In particular, adverse changes in general economic conditions and in the industries in which the issuers are engaged and changes in the financial condition of the issuers are more likely to cause price volatility and weaken the capacity of the issuer to make principal and interest payments than is the case for higher-grade debt securities. These securities are susceptible to default or decline in market value due to real or perceived

adverse economic and business developments relating to the issuer, market interest rates and market liquidity. In addition, a Fund that invests in lower-quality securities may incur additional expenses to the extent recovery is sought on defaulted securities. Because of the many risks involved in investing in lower-rated debt securities, the success of such investments is dependent on the credit analysis of the Manager.

During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress, which could adversely affect their ability to make payments of interest and principal and increase the possibility of default. In addition, such issuers may not have more traditional methods of financing available to them and may be unable to repay debt at maturity by refinancing. The risk of loss due to default by such issuers is significantly greater because such securities frequently are unsecured and subordinated to the prior payment of senior indebtedness.

At certain times in the past, the market for lower-rated debt securities has expanded rapidly, and its growth generally paralleled a long economic expansion. In the past, the prices of many lower-rated debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on lower-rated debt securities rose dramatically. However, such higher yields did not reflect the value of the income stream that holders of such securities expected, but rather the risk that holders of such securities could lose a substantial portion of their value as a result of the issuers' financial restructuring or defaults. There can be no assurance that such declines will not recur.

The market for lower-rated debt issues generally is thinner or less active than that for higher quality securities, which may limit a Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. Judgment may play a greater role in pricing such securities than it does for more liquid securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of lower rated debt securities, especially in a thinly traded market.

A Fund may invest in securities whose ratings imply an imminent risk of default with respect to such payments. Issuers of securities in default may fail to resume principal or interest payments, in which case a Fund may lose its entire investment.

See Appendix A for further information about the ratings of debt securities assigned by S&P, Fitch, Inc., and Moody's.

**Distressed Assets.** A Fund may invest in distressed securities, including securities of companies that are in financial distress and that are experiencing poor operating results, having substantial capital needs or negative net worth, facing special competitive or product obsolescence problems, including companies involved in bankruptcy or other reorganization and liquidation proceedings. These securities are likely to be particularly risky investments, although they may also offer the potential for correspondingly high returns. Investment in the debt of financially distressed companies domiciled outside the U.S. may involve risks in addition to these. See "Foreign Securities" in this SAI.

A Fund will be subject to significant uncertainty as to when and in what manner and for what value the obligations evidenced by the distressed securities will eventually be satisfied (e.g., through a liquidation of the obligor's assets, an exchange offer or plan of reorganization involving the distressed securities or a payment of some amount in satisfaction of the obligation). There may be little or no liquidity in the markets for distressed securities. In addition, the prices of such securities may be subject to periods of abrupt and erratic market movements and above-average price volatility. It may be difficult to obtain financial information regarding the financial condition of a borrower or issuer, and its financial condition may be changing rapidly. As a result, it may be more difficult to value such securities. Even if an exchange offer is made or plan of reorganization is adopted with respect to distressed securities held by a Fund, any securities received by a Fund may be restricted as to resale.

To the extent the Fund invests significantly in securities involving subprime residential mortgage loans (*i.e.*, loans to borrowers with lower credit scores), it may be subject to certain risks associated with defaults on such loans and any impact to servicers of such loans. In the past, a number of originators and servicers of subprime residential mortgage loans and subprime residential mortgage-backed securities ("RMBS") have experienced serious financial difficulties and, in some cases, have entered bankruptcy proceedings. The inability of the originator to repurchase such mortgage loans in the event of early payment defaults and other loan representation breaches may also affect the performance of residential mortgage backed securities backed by those subprime mortgage loans and subprime RMBS. Interest rate spreads for RMBS tend to be volatile; to the extent the Fund invests in RMBS, the assets of the Fund may be negatively affected by such volatility and the Fund may experience difficulty in the management and reinvestment of its investments.

**Inflation-Indexed Securities; U.S. Treasury Inflation Protected Securities (formerly "TIPS").** Inflation-indexed bonds are fixed income securities whose principal value or coupon (interest payment) is periodically adjusted according to the rate

of inflation. A Fund may invest in inflation-indexed securities issued in any country. Two structures are common. The U.S. Treasury Department and some other issuers use a structure that accrues inflation into the principal value of the bond. Other issuers pay out the index-based accruals as part of a semiannual coupon.

A Fund may invest in U.S. Treasury Department inflation-indexed securities, formerly called “U.S. Treasury Inflation Protected Securities” (“U.S. TIPS”), which are backed by the full faith and credit of the U.S. Government. The periodic adjustment of U.S. TIPS is currently tied to the Consumer Price Index for All Urban Consumers (“CPI-U”), which is calculated by the Bureau of Labor Statistics, which is part of the Labor Department. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a non-U.S. government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can be no assurance that the CPI-U or any non-U.S. inflation index will accurately measure the real rate of inflation in the prices of goods and services. In addition, there can be no assurance that the rate of inflation in a non-U.S. country will be correlated to the rate of inflation in the United States. There is a three-month lag in calculating the CPI-U for purposes of adjusting the principal value of U.S. TIPS which presents a risk that adjustments will not reflect current inflation rates.

Interest is calculated on the basis of the current adjusted principal value. The principal value of inflation-indexed securities declines in periods of deflation, but holders at maturity receive no less than par. However, if a Fund purchases inflation-indexed securities in the secondary market whose principal values have been adjusted upward due to inflation since issuance, the Fund may experience a loss if there is a subsequent period of deflation. If inflation is lower than expected during the period a Fund holds the security, the Fund may earn less on it than on a conventional bond. A Fund may also invest in other inflation-related bonds which may not provide a guarantee of principal. If there is no guarantee of principal, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

Because the coupon rate on inflation-indexed securities is lower than fixed-rate U.S. Treasury Department securities, the CPI-U would have to rise at least to the amount of the difference between the coupon rate of the fixed-rate U.S. Treasury Department issues and the coupon rate of the inflation-indexed securities, assuming all other factors are equal, in order for such securities to match the performance of the fixed-rate

U.S. Treasury Department securities. Inflation-indexed securities are expected to react primarily to changes in the “real” interest rate (*i.e.*, the nominal (or stated) rate less the rate of inflation), while a typical bond reacts to changes in the nominal interest rate. Accordingly, inflation-indexed securities have characteristics of fixed-rate U.S. Treasury Department securities having a shorter duration. Changes in market interest rates from causes other than inflation will likely affect the market prices of inflation-indexed securities in the same manner as conventional bonds.

Any increase in the principal value of an inflation-indexed security is taxable in the year the increase occurs, even though its holders do not receive cash representing the increase until the security matures. Because a Fund must distribute substantially all of its net investment income (including non-cash income attributable to those principal value increases) and net realized gains to its shareholders each taxable year to continue to qualify for treatment as a RIC and to minimize or avoid payment of federal income and excise taxes, a Fund may have to dispose of other investments under disadvantageous circumstances to generate cash, or may be required to borrow, to satisfy its distribution requirements.

**Mortgage-Backed Securities.** The Fund may invest in mortgage-backed securities. Mortgage-backed securities represent interests in, or are secured by and payable from, pools of mortgage loans originated by lenders such as commercial banks, savings associations and mortgage bankers and brokers. Those securities may be guaranteed by a U.S. Government agency or instrumentality (such as by Ginnie Mae); issued and guaranteed by a government-sponsored stockholder-owned corporation, though not backed by the full faith and credit of the United States (such as by Fannie Mae or Freddie Mac (collectively, the “GSEs”) and described in greater detail below); or issued by fully private issuers. Private issuers are generally originators of and investors in mortgage loans and include savings associations, mortgage bankers, commercial banks, investment bankers, and special purpose entities. Private mortgage-backed securities may be backed by U.S. Government agency supported mortgage loans or some form of non-governmental credit enhancement.

Mortgage-backed securities may have either fixed or adjustable interest rates. Tax or regulatory changes may adversely affect the mortgage securities market. In addition, changes in the market’s perception of the issuer may affect the value of mortgage-backed securities.

The rate of return on mortgage-backed securities may be affected by prepayments of principal on the underlying loans, which generally increase as market interest rates decline; as a result, when interest rates decline, holders of these securities normally do not benefit from appreciation in market value to the same extent as holders of other non-callable debt securities.

By contrast, increasing market interest rates generally extend the effective maturities of mortgage-backed securities, increasing their sensitivity to interest rate changes. Because of prepayments and extensions, the actual maturity and duration of mortgage-backed securities are typically different than their stated final maturity and their duration calculated solely on the basis of the stated life and payment schedule. The ability of the Fund to successfully utilize mortgage-backed securities depends largely on the ability of the Adviser to forecast interest rates and other economic factors correctly.

The terms and characteristics of the mortgage instruments are generally uniform within a pool but may vary among pools. Mortgage poolers apply qualification standards, credit standards and underwriting criteria for individual mortgages included in the pools to the lending institutions, which originate mortgages for the pools. Mortgage-backed securities differ from other forms of fixed-income securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or on specified call dates. Most mortgage-backed securities, however, are pass-through securities, which means that investors receive payments consisting of a pro-rata share of both principal and interest (less servicing and other fees), and unscheduled prepayments, as loans in the underlying mortgage pool are paid off by the borrowers. In this respect, the returns on mortgage-backed securities are less predictable.

To lessen the effect of the failures by obligors to pay mortgage loans in the pools, mortgage-backed securities may contain elements of credit enhancement, consisting of either (1) liquidity protection or (2) protection against losses resulting after default by an obligor on the underlying assets and allocation of all amounts recoverable directly from the obligor and through liquidation of the collateral. This protection may be provided through guarantees, insurance policies or letters of credit obtained by the issuer or sponsor from third parties, through various means of structuring the transaction or through a combination of these.

Governmental entities, private insurers, and mortgage poolers issue forms of insurance and guarantees. The Adviser considers such insurance and guarantees, as well as the creditworthiness of the issuers thereof, in determining whether a mortgage-backed security meets a Fund's investment quality standards. There can be no assurance that private insurers or guarantors can meet their obligations under insurance policies or guarantee arrangements. A Fund may buy mortgage-backed securities without insurance or guarantees, if the Manager determines that the securities meet the Fund's quality standards.

*Government and Agency Mortgage-Backed Securities.* Certain Mortgage-Backed Securities are U.S. Government Agency Securities because they are issued or guaranteed by a U.S. Government agency. See "U.S. Government and Agency Securities" in this SAI. Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include Fannie Mae and Freddie Mac. Fannie Mae is a government-sponsored corporation owned by stockholders. It is subject to general regulation by the Federal Housing Finance Authority ("FHFA"). Fannie Mae purchases residential mortgages from a list of approved seller/servicers that include state and federally chartered savings and loan associations, mutual savings banks, commercial banks, credit unions and mortgage bankers. Fannie Mae guarantees the timely payment of principal and interest on pass-through securities that it issues, but those securities are not backed by the full faith and credit of the U.S. Government.

Freddie Mac is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned by stockholders. Freddie Mac issues Participation Certificates ("PCs"), which represent interests in mortgages from Freddie Mac's national portfolio. Freddie Mac guarantees the timely payment of interest and ultimate collection of principal on the PCs it issues, but those PCs are not backed by the full faith and credit of the U.S. Government. No assurance can be given that the Federal Reserve, U.S. Treasury Department, or FHFA initiatives will ensure that the government sponsored entities ("GSEs"), such as Fannie Mae and Freddie Mac, will remain successful in meeting their obligations with respect to the securities they issue into the future. The principal and interest on GNMA pass-through securities are backed by the full faith and credit of the U.S. Government.

The U.S. Treasury Department has historically had the authority to purchase obligations of Fannie Mae and Freddie Mac. However, in 2008, due to capitalization concerns, Congress provided the U.S. Treasury Department with additional authority to lend the GSEs emergency funds and to purchase their stock. In September 2008, those capital concerns led the U.S. Treasury Department and the FHFA to announce that the GSEs had been placed in conservatorship. This structure results in increased sensitivity to dramatic housing downturns.

In the first quarter of 2018, Fannie Mae and Freddie Mac each reported that the passage of the Tax Cuts and Jobs Act in December 2017 had resulted in a decrease in the value of their deferred tax assets. As a result, Fannie Mae and Freddie Mac each reported net losses during the fourth quarter of 2017 and indicated that they would request draws from the U.S. Treasury in the amount of \$3.7 billion and \$0.3 billion, respectively.

In late 2020, the FHFA issued a new capital rule requiring Fannie Mae and Freddie Mac to hold \$283 billion in unadjusted total capital as of June 30, 2020, based on their assets at the time. In January 2021, the FHFA and the U.S. Treasury Department agreed to amend the preferred stock purchase agreements for the shares in Fannie Mae and Freddie Mac that the federal government continues to hold. The amendments permit Fannie Mae and Freddie Mac to retain all earnings until they have reached the requirements set by the 2020 capital rule. Nevertheless, the future of the GSEs is in serious question as the tax cuts that resulted in the GSEs reporting losses may become permanent, and the U.S. Government is considering multiple options, ranging on a spectrum from significant reform, nationalization, privatization, consolidation, or abolishment of the entities.

*Privately Issued Mortgage-Backed Securities.* Mortgage-backed securities that are offered, insured or guaranteed by private issuers include pass-through securities consisting of pools of conventional residential mortgage loans; mortgage-backed bonds, which are considered to be debt obligations of the institution issuing the bonds and are collateralized by mortgage loans; and bonds and collateralized mortgage obligations that are collateralized by mortgage-backed securities issued by GNMA, FNMA or FHLMC or by pools of conventional mortgages of multi-family or commercial mortgage loans. Privately-issued mortgage-backed securities generally offer a higher rate of interest (but greater credit and interest rate risk) than securities issued by U.S. Government issuers because there are no direct or indirect governmental guarantees of payment.

The mortgage loans underlying private mortgage-related securities may, and frequently do, have less favorable collateral, credit risk or other underwriting characteristics than government or government-sponsored mortgage-related securities and have wider variances in a number of terms including interest rate, term, size, purpose and borrower characteristics. Privately issued pools more frequently include second mortgages, subprime mortgage loans, high loan-to-value mortgages and manufactured housing loans. Subprime loans refer to loans made to borrowers with weakened credit histories or with a lower capacity to make timely payments on their loans. Market factors adversely affecting mortgage loan repayments may include a general economic downturn, high unemployment, a general slowdown in the real estate market, a drop in the market prices of real estate, or an increase in interest rates resulting in higher mortgage payments by holders of adjustable rate mortgages.

The market for privately-issued mortgage-backed securities is smaller and less liquid than the market for mortgage-backed securities issued by U.S. government issuers. There can be no assurance that the private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Privately issued mortgage-related securities are not traded on an exchange and there may be a limited market for the securities, especially when there is a perceived weakness in the mortgage and real estate market sectors. Without an active trading market, mortgage-related securities held in a fund's portfolio may be particularly difficult to value because of the complexities involved in assessing the value of the underlying mortgage loans.

*Adjustable Rate Mortgage Securities.* Adjustable rate mortgage securities ("ARMs") are pass-through securities representing interests in pools of mortgage loans with adjustable interest rates that are reset at periodic intervals, usually by reference to some interest rate index or market interest rate. The value of ARMs is generally expected to change based on changes in interest rates. However, changes in interest rates on ARMs may lag behind changes in prevailing market interest rates. This may result in a slightly lower valuation in rising rate environments until the interest rate on ARMs resets to higher market interest rates. The Fund may suffer a loss of principal in connection with sales of ARMs when market rates are increasing but the ARMs' rate has not yet been reset. Further, certain ARMs (and the underlying mortgages) are subject to caps or floors that limit the maximum change in interest rates during a specified period or over the life of the security.

*Stripped Mortgage-Backed Securities.* The Fund may invest in stripped mortgage-backed securities ("SMBS"). Stripped mortgage-backed securities are multi-class mortgage-backed securities that are created by separating the securities into their principal and interest components and selling each piece separately. SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of SMBS will have one class receiving some of the interest and most of the principal from the mortgage assets, while the other class will receive most of the interest and the remainder of the principal. If the underlying mortgage assets experience greater than anticipated prepayments of principal, a Fund may fail to recoup some or all of its initial investment in these securities even if the security is in one of the highest rating categories. Established trading markets have not yet developed for SMBS and, accordingly, these securities may be deemed "illiquid" and subject to a Fund's limitations on investments in illiquid securities.

**Collateralized Obligations.** Collateralized obligations include Collateralized Mortgage Obligations, Collateralized Mortgage-Backed Bonds, and Collateralized Loan Obligations, each as described herein.

*Collateralized Mortgage Obligations (“CMOs”).* CMOs are bonds that are collateralized by whole-loan mortgages or mortgage pass-through securities. The bonds issued in a CMO deal are divided into groups, and each group of bonds is referred to as a “tranche.” Under the traditional CMO structure, the cash flows generated by the mortgages or mortgage pass-through securities in the collateral pool are used to first pay interest and then pay principal to the CMO bondholders. The bonds issued under such a CMO structure are retired sequentially as opposed to the pro-rata return of principal found in traditional pass-through obligations. Subject to the various provisions of individual CMO issues, the cash flow generated by the underlying collateral (to the extent it exceeds the amount required to pay the stated interest) is used to retire the bonds. Under the CMO structure, the repayment of principal among the different tranches is prioritized in accordance with the terms of the particular CMO issuance. The “fastest pay” tranche of bonds, as specified in the prospectus for the issuance, would initially receive all principal payments. When that tranche of bonds is retired, the next tranche, or tranches, in the sequence, as specified in the prospectus, receive all of the principal payments until they are retired. The sequential retirement of bond groups continues until the last tranche, or group of bonds, is retired. Accordingly, the CMO structure allows the issuer to use cash flows of long maturity, monthly pay collateral to formulate securities with short, intermediate, and long final maturities and expected average lives.

New types of CMO tranches continue to evolve, such as floating rate CMOs, planned amortization classes, accrual bonds, and CMO residuals. Some newer structures could affect the amount and timing of principal and interest received by each tranche from the underlying collateral. Under certain structures, given classes of CMOs have priority over others with respect to the receipt of prepayments on the mortgages. Therefore, depending on the type of CMOs in which the funds invest, the investment may be subject to a greater or lesser risk of prepayment than other types of mortgage-related securities.

The primary risk of any mortgage security is the uncertainty of the timing of cash flows. For CMOs, the primary risk results from the rate of prepayments on the underlying mortgages serving as collateral and from the structure of the deal (priority of the individual tranches). An increase or decrease in prepayment rates (resulting from a decrease or increase in mortgage interest rates) will affect the yield, average life, and price of CMOs. The prices of certain CMOs, depending on their structure and the rate of prepayments, can be volatile. Some CMOs may also not be as liquid as other securities.

*Collateralized Mortgage-Backed Bonds (“CBOs”).* CBOs are general obligations of a trust or other special purpose entity that are collateralized, directly or indirectly, by a diversified pool of fixed-income securities which may include high risk, below investment grade securities. Because CBOs are similar to CLOs (as defined below), they are discussed together immediately below.

*Collateralized Loan Obligations (“CLOs”).* CLOs and CBOs (together, “CDOs”) are types of asset-backed securities. A CLO is ordinarily issued by a trust or other special purpose entity and is typically comprised of or collateralized by a pool of loans, which may include, among others, domestic and non-U.S. senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans.

For CDOs, the loans held by the trust or special purpose entity (*i.e.*, the issuer) generate cash flow that is allocated among one or more classes of securities (*i.e.*, tranches) that vary in risk and yield. The most senior tranche has the best credit quality and the lowest yield compared to the other tranches. The equity tranche has the highest potential yield but also has the greatest risk, as it bears the bulk of defaults from the underlying loans and helps to protect the more senior tranches from risk of these defaults. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which a Fund invests.

Certain CLOs may receive credit enhancement in the form of a senior-subordinate structure, over-collateralization or bond insurance, but such enhancement may not always be present and may fail to protect against loss due to defaults on the collateral. Certain CLOs may not hold loans directly, but rather, use derivatives such as swaps to create “synthetic” exposure to the collateral pool of loans. Such CLOs entail the risks of derivative instruments described elsewhere in this SAI.

Since it is partially protected from defaults, a senior tranche of a CDO typically has higher ratings and lower yields than their underlying securities. Certain CDOs may even be rated investment grade. Nevertheless, CDO tranches can experience substantial losses due to actual or anticipated defaults, increased sensitivity to defaults due to collateral default, and the disappearance of protecting tranches. The risks of an investment in a CDO depend largely on the type of the collateral securities underlying it and the class (or tranche) in which the Fund invests.

Normally, CDOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in them may be characterized by the Fund as illiquid securities; however, an active dealer market may exist for CLOs allowing a CLO to qualify for transactions pursuant to Rule 144A under the 1933 Act. In addition, CLOs normally charge management fees and administrative expenses, which are in addition to those of a Fund.

**Asset-Backed Securities.** The Fund may invest in asset-backed securities. Asset-backed securities have structural characteristics similar to mortgage-backed securities but have underlying assets that are not mortgage loans or interests in mortgage loans. Asset-backed securities represent fractional interests in, or are secured by and payable from, pools of assets such as motor vehicle installment sales contracts, installment loan contracts, leases of various types of real and personal property and receivables from revolving credit (for example, credit card) agreements. Assets are securitized through the use of trusts and special purpose corporations that issue securities that are often backed by a pool of assets representing the obligations of a number of different parties. Asset-backed securities have structures and characteristics similar to those of mortgage-backed securities; accordingly they are subject to many of the same risks, though often to a greater extent.

The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk of the originator or any other affiliated entities, and the amount and quality of any credit enhancements associated with the securities. Payments or distributions of principal and interest on asset-backed securities may be supported by credit enhancements including letters of credit, an insurance guarantee, reserve funds and over collateralization.

**Municipal Obligations.** The Fund may invest in municipal obligations. Municipal obligations are issued by or on behalf of states, the District of Columbia, and U.S. territories and possessions and their political subdivisions, agencies, and instrumentalities. In addition, municipal securities include securities issued by or on behalf of public authorities to finance various privately operated facilities, such as industrial development bonds, that are backed only by the assets and revenues of the non-governmental user (such as hospitals and airports).

The interest on municipal obligations is generally exempt from federal income tax. A Fund determines the tax-exempt status of the interest on any issue of municipal obligations based on an opinion of the issuer's bond counsel, which is not binding on the U.S. Internal Revenue Service ("Service") or the courts, at the time the obligations are issued. The Service occasionally challenges the tax-exempt status of the interest on particular municipal securities. If the Service determined that interest earned on a municipal security a Fund held was taxable and the issuer thereof failed to overcome that determination, that interest would be taxable to the Fund, possibly retroactive to the time the Fund purchased the security.

As with other fixed income securities, an increase in interest rates generally will reduce the value of a Fund's investments in municipal obligations, whereas a decline in interest rates generally will increase that value. The value of municipal obligations depends generally on the continuing payment of interest and principal when due by the issuers of the municipal obligations or, as applicable.

A Fund may purchase municipal securities that are fully or partially backed by entities providing credit support such as letters of credit, guarantees, or insurance. The credit quality of the entities that provide such credit support will affect the market values of those securities.

Municipal securities are issued to obtain funds for a variety of public purposes, including general financing for state and local governments, or financing for specific projects or public facilities. Municipal securities are classified as general obligation or revenue bonds or notes. General obligation securities are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue securities are payable from revenue derived from a particular facility, class of facilities, or the proceeds of a special excise tax or other specific revenue source, but not from the issuer's general taxing power. Private activity bonds and industrial revenue bonds do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. "Anticipation notes" are issued by municipalities in expectation of future proceeds from the issuance of bonds or from taxes or other revenues and are payable from those bond proceeds, taxes, or revenues. Municipal leases are entered into by state, territory and local governments and authorities to acquire equipment and facilities such as fire and sanitation vehicles, telecommunications equipment, and other assets. Municipal leases (which normally provide for title to the leased assets to pass eventually to the government issuer) have evolved as a means for governmental issuers to acquire property and equipment outside of constitutional and statutory limits. Municipal obligations also include tax-exempt commercial paper, which is issued by municipalities to help finance short-term capital or operating requirements.

Unlike other types of investments, municipal obligations have traditionally not been subject to the registration requirements of the federal securities laws. This lack of SEC regulation has adversely affected the quantity and quality of information available to the bond markets about issuers and their financial condition. The SEC has responded to the need for such information with a rule that requires that underwriters to reasonably determine that an issuer of municipal securities will publish certain information regarding its financial condition and material events relating to such securities.

The federal bankruptcy statutes provide that, in certain circumstances, political subdivisions and authorities of states may initiate bankruptcy proceedings without prior notice to or consent of their creditors. These proceedings could result in material and adverse changes in the rights of holders of their obligations.

**Non-U.S. Dollar Denominated Debt.** The Fund may invest in non-U.S. dollar denominated securities, including debt obligations denominated in foreign or composite currencies (such as the European Currency Unit) issued by (1) foreign national, provincial, state or municipal governments or their political subdivisions or by (2) international organizations designated or supported by governmental entities (e.g., the World Bank and the European Community).

Investments in debt securities issued by foreign governments and their political subdivisions or agencies (“Sovereign Debt”) are subject to risks in addition to those relating to non-U.S. investments generally. A sovereign debtor’s willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its non-U.S. reserves, the availability of sufficient non-U.S. exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor’s policy toward principal international lenders and the political constraints to which a sovereign debtor may be subject. Increased protectionism on the part of a country’s trading partners or political changes in those countries, could also adversely affect its exports. Such events could diminish a country’s trade account surplus, if any, or the credit standing of a particular local government or agency. Political conditions, especially a sovereign entity’s willingness to meet the terms of its debt obligations, are of considerable significance.

Sovereign debtors may be dependent on disbursements or assistance from foreign governments or multinational agencies, the country’s access to trade and other international credits, and the country’s balance of trade. Assistance may be dependent on a country’s implementation of austerity measures and reforms, which measures may limit or be perceived to limit economic growth and recovery. Some sovereign debtors have rescheduled their debt payments, declared moratoria on payments or restructured their debt to effectively eliminate portions of it, and similar occurrences may happen in the future. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal and/or interest when due. In addition, there may be limited legal recourse in the event of a default by a sovereign entity; the entity may even be immune from lawsuits. There is no bankruptcy proceeding by which sovereign debt on which governmental entities have defaulted may be collected in whole or in part. Also, holders of commercial bank debt issued by the same sovereign entity may contest payments to the holders of Sovereign Debt in the event of default under commercial bank loan agreements.

The ability of some sovereign debtors to repay their obligations may depend on the timely receipt of assistance from international agencies or other governments, the flow of which is not assured. The willingness of such agencies to make these payments may depend on the sovereign debtor’s willingness to institute certain economic changes, the implementation of which may be politically difficult.

The occurrence of political, social or diplomatic changes in one or more of the countries issuing Sovereign Debt could adversely affect a Fund’s investments. Political changes or a deterioration of a country’s domestic economy or balance of trade may affect the willingness of countries to service their Sovereign Debt.

Sovereign Debt may include: debt securities issued or guaranteed by governments, governmental agencies or instrumentalities and political subdivisions located in emerging market countries; debt securities issued by government owned, controlled or sponsored entities located in emerging market countries; interests in entities organized and operated for the purpose of restructuring the investment characteristics of instruments issued by any of the above issuers; participations in loans between emerging market governments and financial institutions; and Brady Bonds, which are debt securities issued under the framework of the Brady Plan as a means for debtor nations to restructure their outstanding external indebtedness.

Supranational entities may also issue debt securities. A supranational entity is a bank, commission or company established or financially supported by the national governments of one or more countries to promote reconstruction or development. Included among these organizations are the Asian Development Bank, the European Investment Bank, the Inter-American Development Bank, the International Monetary Fund, the United Nations, the World Bank and the European Bank for Reconstruction and Development. Supranational organizations have no taxing authority and are dependent on their members for payments of interest and principal. Further, the lending activities of such entities are limited to a percentage of their total capital, reserves and net income.

**Variable Amount and Floating Rate Securities.** The Fund may invest in variable and floating rate securities, including those with no stated maturity date (“perpetual floaters”). Variable rate and floating rate securities provide for automatic adjustment of the interest rate at fixed intervals (e.g., daily, weekly, monthly, or semi-annually) or automatic adjustment of the interest rate whenever a specified interest rate or index changes. The interest rate on variable and floating rate securities

(collectively, “Adjustable Rate Securities”) ordinarily is determined by reference to a particular bank’s prime rate, the 90-day U.S. Treasury Department Bill rate, the rate of return on commercial paper or bank CDs, an index of short-term tax-exempt rates or some other objective measure. For certain Adjustable Rate Securities, the interest rate may be reset in the opposite direction of changes in the interest rate to which it is indexed (“inverse floaters”). The market value of inverse floaters may be more volatile than the market value of other Adjustable Rate Securities.

Adjustable Rate Securities frequently permit the holder to demand payment of the obligations’ principal and accrued interest at any time or at specified intervals not exceeding one year. The demand feature usually is backed by a credit instrument (e.g., a bank letter of credit) from a creditworthy issuer and sometimes by insurance from a creditworthy insurer. Without these credit enhancements, some Adjustable Rate Securities might not meet a Fund’s quality standards. Accordingly, in purchasing these securities, a Fund may rely on the creditworthiness of the credit instrument issuer or the insurer.

Variable and floating rate demand notes of corporations are redeemable upon a specified period of notice, typically not to exceed seven days. These obligations include master demand notes, including variable amount master demand notes, which permit investment of fluctuating amounts at varying interest rates under direct arrangements with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days’ notice. As variable amount master demand notes are unsecured, issuers typically must meet certain quality criteria.

Certain securities may have an initial principal amount that varies over time based on an interest rate index, and, accordingly, the Fund might be entitled to less than the initial principal amount of the security upon the security’s maturity. The Fund intends to purchase these securities only when the Adviser believes the interest income from the instrument justifies any principal risks associated with the instrument. The Adviser may attempt to limit any potential loss of principal by purchasing similar instruments that are intended to provide an offsetting increase in principal. There can be no assurance that the Adviser will be able to limit the effects of principal fluctuations and, accordingly, the Fund may incur losses on those securities even if held to maturity without issuer default.

There may not be an active secondary market for any particular floating or variable rate instruments, which could make it difficult for the Fund to dispose of the instrument during periods that the Fund is not entitled to exercise any demand rights it may have. The Fund could, for this or other reasons, suffer a loss with respect to such instruments.

**Structured Notes.** The Fund may invest in structured notes. Structured notes include, but are not limited to, reverse convertible notes, interest rate-linked notes, credit-linked notes, commodity-linked notes and dual currency notes. Structured notes are debt obligations where the interest rate and/or principal amount payable upon maturity or redemption of the note is determined by the performance of an underlying reference instrument, such as an asset, market or interest rate. Structured notes may be positively or negatively indexed; that is, an increase in the value of the reference instrument may produce an increase or decrease in the interest rate or principal. Further, the rate of return on a structured note may be determined by the application of a multiplier to the percentage change (positive or negative) in value of the reference instrument.

Generally, investments in such notes are used as a substitute for positions in underlying indicators. The performance results of structured notes will not replicate exactly the performance of the underlying indicator that the notes seek to replicate due to transaction costs and other expenses. Many types of structured notes may also be “replicated” through a combination of holdings in equity and fixed-income securities and derivative instruments such as call or put options.

Investments in structured notes involve many of the same risks associated with a direct investment in the underlying indicator the notes seek to replicate. Structured notes may be considered hybrid instruments as they may exhibit features of both fixed income securities and derivatives. The return on a structured note that is linked to a particular underlying indicator that pays dividends generally is increased to the extent of any dividends paid in connection with the underlying indicator. However, the holder of a structured note typically does not receive voting rights and other rights as it would if it directly owned the underlying indicator. In addition, structured notes are subject to counterparty risk, which is the risk that the issuer of the structured note will not fulfill its contractual obligation to complete the transaction with a Fund. Structured notes constitute general unsecured contractual obligations of the issuer of the note and a Fund is relying on the creditworthiness of such issuer and has no rights under a structured note against the issuer of an underlying indicator. Structured notes involve transaction costs. Structured notes may be considered illiquid and, therefore, structured notes considered illiquid will be subject to a Fund’s percentage limitation on investments in illiquid securities.

Issuers of structured notes vary and may include corporations, banks, broker-dealers and limited purpose trusts or other vehicles. Structured notes may be exchange traded or traded OTC and privately negotiated to meet a particular investor’s requirements.

**Bank Loans.** A Fund's return on any investment in a bank loan will depend primarily on the financial condition of the borrower. Although most bank loans are secured by assets of the borrower, some loans may be unsecured, in which case the Fund and other lenders would be unsecured creditors of the borrower. Even where a bank loan is secured by collateral of the borrower, the return on a loan can decline, or may be insufficient to meet the borrower's obligations or difficult to liquidate.

If a borrower becomes insolvent, access to collateral may be limited by bankruptcy and other laws. Borrowers that are in bankruptcy may pay only a small portion of the amount owed, if they are able to pay at all. In addition, if a secured loan is foreclosed, a Fund may bear the costs and liabilities associated with owning and disposing of the collateral. The collateral may be difficult to sell and a Fund would bear the risk that the collateral may decline in value while the Fund is holding it. There is also a possibility that a Fund will become the owner of its pro rata share of the collateral which may carry additional risks and liabilities. In addition, under legal theories of lender liability, a Fund potentially might be held liable as a co-lender. In the event of a borrower's bankruptcy or insolvency, the borrower's obligation to repay the loan may be subject to certain defenses that the borrower can assert as a result of improper conduct by the Agent (as defined below).

Because of the importance of the financial condition of a borrower, banks and other lending institutions generally perform a credit analysis of the borrower before originating a loan or participating in a lending syndicate. In selecting the loans in which the Fund will invest, the Adviser will consider such entity's credit analysis but will not rely solely on it; rather, the Adviser will perform its own credit analysis of the borrower when investing in any bank loan. Any decision by the Fund to invest in a particular loan will depend almost exclusively on the Adviser's and the original lending institution's credit analyses of the borrower because loans in which the Fund may invest may not be rated by independent credit rating agencies.

Loans are generally subject to legal or contractual restrictions on resale. Loans are not currently listed on any securities exchange or automatic quotation system. Accordingly, the Fund may not be able to liquidate any position in a loan in a desirable timeframe, which may entail losses. In addition, the Fund may be required to pay various fees and commissions in the process of purchasing, selling, and holding loans, which reduce any return on the loan.

The Fund may invest in bank loans of any quality, including "distressed" loans, in three ways: directly, by participating in a loan syndicate or being assigned a loan by another lender (in a syndicate). All bank loans may be fixed or variable rate and are subject to prepayment and maturity risks.

*Direct Investments.* When purchasing a loan, the Fund acquires some or all of the interest of a bank or other lending institution in a loan to a particular borrower at par value. Secondary purchases of loans may be made at a premium to par, at par, or at a discount to par. Therefore, a Fund's return on a secondary investment may be lower, equal, or higher than if the Fund had made a direct investment. As an initial investor in a new loan, the Fund may be paid a commitment fee.

*Assignment.* The Fund also may purchase loans by assignment from another lender. When a Fund purchases a loan by assignment, the Fund typically succeeds to the rights of the assigning lender under the loan agreement and becomes a lender under the loan agreement. However, assignments may be arranged through private negotiations, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender.

*Participation.* A Fund's rights under a participation interest with respect to a particular loan may be more limited than the rights of original lenders or of investors who acquire an assignment of that loan. In a participation interest, a Fund will usually have a contractual relationship only with the selling institution and not the underlying borrower. A Fund normally will have to rely on the participating lender to demand and receive payments in respect of the loans, and to pay those amounts on to the Fund; thus, a Fund will be subject to the risk that the lender may be unwilling or unable to do so. In such a case, a Fund would not likely have any rights against the borrower directly. In addition, a Fund generally will have no right to object to certain changes to the loan agreement agreed to by the participating lender.

In buying a participation interest, a Fund assumes the credit risk of the participating lender as well as the borrower. This is true for several reasons. Among others, a Fund may not directly benefit from the collateral supporting the related loan, including due to rights of set off the borrower may have against the selling institution (*i.e.*, the participating lender). For example, in the event of bankruptcy or insolvency of the borrower, the obligation of the borrower to repay the loan may be subject to defenses that the participating lender engaged in improper conduct, resulting in delays, expenses and risks that are in addition to those that would apply if the Fund were an original lender or assignee. In addition, if the participating lender fails to perform its obligations under the participation agreement, a Fund might incur costs and delays in realizing payment and suffer a loss of principal and/or interest. Further, if a participating lender becomes insolvent, a Fund may be treated as a general (rather than a secured) creditor of that lender and thus may not benefit from the participating lender's rights of set off against the borrower.

*Agents.* Bank loans are typically administered by a bank, insurance company, finance company or other financial institution (the “Agent”) for a lending syndicate of financial institutions. Under most loan agreements, the Agent is given broad authority in monitoring the borrower’s performance and is obligated to use the same care it would use in the management of its own property, although the Agent may or may not be a participating lender. In a typical loan, the Agent administers the terms of the loan agreement and is responsible for the collection of principal and interest and fee payments from the borrower and the apportionment of these payments to all lenders that are parties to the loan agreement. In addition, the Agent may hold collateral on behalf of the lenders. In asserting rights against a borrower, a Fund normally will be dependent on the willingness of the lead bank to assert these rights, or upon a vote of all the lenders to authorize the action.

If an Agent becomes insolvent, or has a receiver, conservator, or similar official appointed for it by the appropriate regulatory authority, or becomes a debtor in a bankruptcy proceeding, the Agent’s appointment may be terminated and a successor agent would be appointed. If an appropriate regulator or court determines that assets held by the Agent for the benefit of the purchasers of loans are subject to the claims of the Agent’s general or secured creditors, a Fund might incur certain costs and delays in realizing payment on a loan or suffer a loss of principal and/or interest. A Fund may be subject to similar risks when it buys a participation interest or an assignment from an intermediary.

**Financial Institution Obligations.** The Fund may invest in financial institution obligations. Obligations of financial institutions include, among other things, negotiable certificates of deposit (“CDs”), bankers’ acceptances and other short-term and long-term debt obligations issued by commercial banks and savings institutions.

- A certificate of deposit is a short-term negotiable certificate issued by a commercial bank against funds deposited in the bank and is either interest-bearing or purchased on a discount basis.
- A bankers’ acceptance is a short-term draft drawn on a commercial bank by a borrower, usually in connection with an international commercial transaction. The borrower is liable for payment as is the bank, which unconditionally guarantees to pay the draft at its face amount on the maturity date.
- Fixed time deposits are obligations of branches of U.S. banks or foreign banks that are payable at a stated maturity date and bear a fixed rate of interest. Although fixed time deposits do not have a market, there are no contractual restrictions on the right to transfer a beneficial interest in the deposit to a third party.
- Deposit notes are notes issued by commercial banks that generally bear fixed rates of interest and typically have original maturities ranging from eighteen months to five years.

Bank obligations may be general obligations of the parent bank or may be limited to the issuing branch by the terms of the specific obligations or by government regulation. Financial institution obligations in which the Fund invests may not be insured by the Federal Deposit Insurance Corporation. Interest rates, general economic conditions, consolidation and competition among banking and savings institutions play an important part in the operations of the financial industry; and exposure to credit losses arising from possible financial difficulties of borrowers might affect a bank’s ability to meet its obligations.

In addition to U.S. financial institution obligations, the Fund may invest in the following U.S.-dollar denominated obligations:

- Eurodollar certificates of deposit, which are issued by offices of foreign and domestic banks located outside the U.S.;
- Yankee certificates of deposit, which are issued by a U.S. branch of a foreign bank and held in the U.S.;
- Eurodollar time deposits, which are deposits in a foreign branch of a U.S. bank or a foreign bank; and
- Canadian time deposits, which are issued by Canadian offices of major Canadian banks.

Securities of foreign banks and foreign branches of U.S. banks involve investment risks in addition to those relating to domestic bank obligations. Such risks include future political and economic developments, the possible seizure or nationalization of foreign deposits, and the possible adoption of foreign governmental restrictions that might adversely affect the payment of principal and interest on such obligations. In addition, foreign banks and foreign branches of U.S. banks may be subject to less stringent reserve requirements. Non-U.S. institutions generally also are subject to different accounting, auditing, reporting and recordkeeping standards than those applicable to U.S. institutions.

## **Zero-Coupon Securities, Step Coupon Securities, Pay-in-Kind Securities and Discount Obligations.**

A Fund may invest in zero coupon securities, step coupon securities and pay-in-kind securities. These do not entitle the holder to any periodic payment of interest prior to maturity or that specify a future date when the securities begin to pay current interest. A Fund may also acquire certain debt securities at a discount. These discount obligations involve special risk considerations. Zero coupon securities and step coupon securities are debt obligations that are issued and traded at a discount from their face amount or par value (known as “original issue discount” or “OID”). OID varies depending on prevailing interest rates, the time remaining until cash payments begin, the liquidity of the security, and the perceived credit quality of the issuer.

Zero coupon securities and step coupon securities are redeemed at face value when they mature. Accrued OID must be included in a Fund’s gross income for federal tax purposes ratably each taxable year prior to the receipt of any actual payments. Pay-in-kind securities pay “interest” through the issuance of additional securities.

Because each Fund must distribute substantially all of its net investment income (including non-cash income attributable to OID and “interest” on pay-in-kind securities) and net realized gains to its shareholders each taxable year to continue to qualify for treatment as a RIC and to minimize or avoid payment of federal income and excise taxes, a Fund may have to dispose of portfolio securities under disadvantageous circumstances to generate cash, or may be required to borrow, to satisfy the distribution requirements.

The market prices of zero coupon securities, step coupon securities, pay-in-kind securities and discount obligations generally are more volatile than the prices of securities that pay cash interest periodically. Those securities and obligations are likely to respond to changes in interest rates to a greater degree than other types of debt securities having a similar maturity and credit quality.

## **D. Hybrid Securities**

**Trust Preferred Securities.** The Fund may purchase trust preferred securities, also known as “trust preferreds”, which are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. An issuer creates trust preferred securities by creating a trust and issuing debt to the trust. The trust in turn issues trust preferred securities. Trust preferred securities are hybrid securities with characteristics of both subordinated debt and preferred stock. Such characteristics include long maturities (typically 30 years or more), early redemption by the issuer, periodic fixed or variable interest payments, and maturities at face value. In addition, trust preferred securities issued by bank holding company may allow deferral of interest payments for up to 5 years. Holders of trust preferred securities have limited voting rights to control the activities of the trust, and no voting rights with respect to the parent company.

**Convertible Securities.** A convertible security is a bond, debenture, note, preferred stock, or other security or debt obligation that may be converted into or exchanged for a given amount of common stock of the same or a different issuer during a specified period and at a specified price or formula in the future. Convertible securities generally have features of, and risks associated with, both equity and fixed income instruments. As such, the value of most convertible securities will vary with changes in the price of, and will be subject to the risks associated with, the underlying common stock. Additionally, convertible securities are also subject to the risk that the issuer may not be able to pay principal or interest when due.

A convertible security entitles the holder to receive interest on debt or the dividend on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, such securities ordinarily provide a stream of income with generally higher yields than common stocks of the same or similar issuers, but lower than the yield on non-convertible debt.

Convertible securities rank senior to common stock in a company’s capital structure but are usually subordinated to comparable non-convertible securities. Convertible securities are often rated below investment grade or not rated because they fall below debt obligations and just above common equity in order of preference or priority on an issuer’s balance sheet. Convertible securities have unique investment characteristics in that they generally: (1) are less subject to fluctuation in value than the underlying common stock since they have fixed-income characteristics; and (2) provide the potential for capital appreciation if the market price of the underlying common stock increases.

The value of a convertible security is a function of (1) its yield in comparison to the yields of other securities of comparable maturity and quality that do not have a conversion privilege and (2) its worth if converted into the underlying common stock. The value of a convertible security is influenced by interest rate changes, with investment values declining as interest

rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors also may have an effect on the convertible security's investment value.

If the convertible security's "conversion value," which is the market value of the underlying common stock that would be obtained upon the conversion of the convertible security, is substantially below the "investment value," which is the value of a convertible security viewed without regard to its conversion feature (*i.e.*, strictly on the basis of its yield), the price of the convertible security is governed principally by its investment value. If the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding an income-producing security.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party, which may adversely impact the Fund.

**Convertible Arbitrage.** Convertible arbitrage involves buying convertible bonds (bonds that are convertible into common stock) or shares of convertible preferred stock (stock that is convertible into common stock) that are believed to be undervalued. In addition to taking "long" positions (*i.e.*, owning the security) in convertible bonds or convertible preferred stock, the Fund may take "short" positions (*i.e.*, borrowing and later selling the security) in the underlying common stock into which the convertible securities are exchangeable in order to hedge against market risk. The strategy is intended to capitalize on relative pricing inefficiencies between the related securities. This strategy may be employed with a directional bias (anticipating the direction of the market) or on a market neutral basis (the direction of the market does not have a significant impact on returns). The source of return from this strategy arises from the fact that convertible bonds may be undervalued relative to other securities due to the complexity of investing in these securities.

Convertible arbitrage is subject to special risks. The identification and exploitation of market opportunities involve uncertainty. No assurance can be given that the adviser will be able to locate investment opportunities or to exploit price discrepancies correctly. A material risk associated with the strategy is that, in the event of an issuer bankruptcy, the gain on any short position held by the Fund may not fully cover the loss on the convertible security. Convertible arbitrage strategies may also be adversely affected by changes in the level of interest rates, downgrades in credit ratings, credit spread fluctuations, defaults and lack of liquidity. A default in interest or principal payments by an issuer could result in a loss of income to the Fund, or a decline in the market value of the securities. Market events may cause certain investors to sell large amounts of convertible securities and adversely affect their market price. The Fund may also realize losses if a transaction is terminated or delayed. Trading for convertible arbitrage strategies may materially increase the Fund's portfolio turnover rate and result in high transaction costs and capital gains tax liabilities. Borrowing securities to cover short positions, as required by regulations, poses additional risks of loss, particularly to the extent that a transaction is terminated or delayed.

## **E. Foreign Securities**

Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of U.S. issuers. Foreign issuers are issuers organized and doing business principally outside the United States. All foreign investments are subject to risks of: (1) foreign political and economic instability; (2) adverse movements in foreign exchange rates; (3) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; and (4) changes in foreign governmental attitudes towards private investment, including potential nationalization, increased taxation or confiscation of the Fund's assets.

The governments of certain countries may prohibit or impose substantial restrictions on foreign investing in their capital markets or in certain industries. Other risks of investing in such securities include political or economic instability in the country involved, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls or limitations on the removal of funds or assets. The prices of such securities may be more volatile than those of domestic securities. With respect to certain foreign countries, there is a possibility of expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, difficulty in obtaining and enforcing judgments against foreign entities or diplomatic developments which could affect investment in these countries. Legal remedies available to investors in certain foreign countries may be less extensive than those available to investors in the United States or other foreign countries.

Securities of issuers traded on exchanges may be suspended, either by the issuers themselves, by an exchange or by government authorities. The likelihood of such suspensions may be higher for securities of issuers in emerging or less-

developed market countries than in countries with more developed markets. Trading suspensions may be applied from time to time to the securities of individual issuers for reasons specific to that issuer, or may be applied broadly by exchanges or governmental authorities in response to market events. Suspensions may last for significant periods of time. The Fund's ability to liquidate its positions or provide liquidity to investors may be compromised and the Fund could incur significant losses.

Dividends and interest payable on foreign securities may be subject to foreign withholding taxes, thereby reducing the income available for distribution or reinvestment by the Fund. Some foreign brokerage commission and custody fees are higher than in the U.S. Foreign accounting, auditing and financial reporting standards differ from those in the U.S. and therefore, less information may be available about foreign companies than is available about issuers of comparable U.S. companies. Foreign securities also may trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the U.S. dollar value of all foreign currency-denominated securities held by the Fund. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities. Generally, when the U.S. dollar rises in value against a foreign currency, a security denominated in that currency loses value because the currency is worth fewer U.S. dollars. Conversely, when the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency gains value because the currency is worth more U.S. dollars. This risk, generally known as "currency risk," means that a stronger U.S. dollar will reduce returns for U.S. investors while a weak U.S. dollar will increase those returns. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the U.S., many of which may be difficult, if not impossible, to predict.

Income from foreign securities may be received and realized in foreign currencies, even though the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar after the Fund's income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. dollars and the time such expenses are paid, the Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

Foreign markets have different clearance and settlement procedures. In certain markets, there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Delays in settlement could result in temporary periods when a portion of the assets of the Fund are uninvested and no return is earned thereon. The inability of the Fund to make intended security purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. Inability to dispose of portfolio securities due to settlement problems could result in losses to the Fund due to subsequent declines in value of the securities or, if the Fund has entered into a contract to sell the securities, could result in possible liability to the purchaser. The inability of the Fund to settle security purchases or sales due to settlement problems could cause the Fund to pay additional expenses, such as interest charges.

The Fund that invests in foreign securities is subject to the risk that its share price may be exposed to arbitrage attempts by investors seeking to capitalize on differences in the values of foreign securities trading on foreign exchanges that may close before the time the Fund's net asset value is determined. If such arbitrage attempts are successful, the Fund's net asset value might be diluted. The use of fair value pricing in certain circumstances (by adjusting the closing market prices of foreign securities to reflect what the Board believes to be their fair value) may help deter such arbitrage activities. The effect of such fair value pricing is that foreign securities may not be priced on the basis of quotations from the primary foreign securities market in which they are traded, but rather may be priced by another method that the Board believes reflects fair value. As such, fair value pricing is based on subjective judgment and it is possible that fair value may differ materially from the value realized on a sale of a foreign security. It is also possible that use of fair value pricing will be inaccurate and/or limit an investment adviser's ability to implement an investment strategy.

**Frontier and Emerging Markets.** If the Fund invests in frontier and emerging markets, which generally carry more risk than investments in developed foreign markets, an investment in the Fund may have the following additional risks:

- Information about the companies in these countries is not always readily available;
- Stocks of companies traded in these countries may be less liquid and the prices of these stocks may be more volatile than the prices of the stocks in more established markets;

- Greater political and economic uncertainties exist in emerging markets than in developed foreign markets;
- The securities markets and legal systems in emerging markets may not be well developed and may not provide the protections and advantages of the markets and systems available in more developed countries;
- Very high inflation rates may exist in emerging markets and could negatively impact a country's economy and securities markets;
- Emerging markets may impose restrictions on the Fund's ability to repatriate investment income or capital and thus, may adversely affect the operations of the Fund;
- Certain emerging markets impose constraints on currency exchange and some currencies in emerging may have been devalued significantly against the U.S. dollar;
- Governments of some emerging markets exercise substantial influence over the private sector and may own or control many companies. As such, governmental actions could have a significant effect on economic conditions in emerging markets, which, in turn, could affect the value of the Fund's investments;
- Emerging markets may be subject to less government supervision and regulation of business and industry practices, stock exchanges, brokers and listed companies; and
- Regulatory authorities in some emerging markets currently do not provide the Public Company Accounting Oversight Board with the ability to inspect public accounting firms as required by U.S. law, including sufficient access to inspect audit work papers and practices, or otherwise do not cooperate with U.S. regulators.

For these and other reasons, the prices of securities in emerging markets can fluctuate more significantly than the prices of securities of companies in developed countries. The less developed the country, the greater effect these risks may have on your investment in the Fund. As a result, an investment in the Fund may exhibit a higher degree of volatility than either the general domestic securities market or the securities markets of developed foreign countries.

#### **F. Foreign Currency Transactions**

Investments in foreign companies will usually involve currencies of foreign countries. The Fund may temporarily hold funds in bank deposits in foreign currencies during the completion of investment programs. The Fund may conduct foreign currency exchange transactions either on a spot (cash) basis at the spot rate prevailing in the foreign exchange market or by entering into a forward foreign currency contract. A forward currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered "derivatives" – financial instruments whose performance is derived, at least in part, from the performance of another asset (such as a security, currency or an index of securities). The Fund enters into forward contracts in order to "lock in" the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipate purchasing, or the U.S. dollar value of interest and dividends paid on those securities. The Fund does not intend to enter into forward contracts on a regular or continuing basis and the Fund will not enter these contracts for speculative purposes. The Fund will not have more than 25% of its total assets committed to forward contracts, or maintain a net exposure to forward contracts that would obligate the Fund to deliver an amount of foreign currency in excess of the value of the Fund's investment securities or other assets denominated in that currency.

At or before settlement of a forward currency contract, the Fund may either deliver the currency or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract. If the Fund makes delivery of the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency through the conversion of assets of the Fund into the currency. The Fund may close out a forward contract obligating it to purchase currency by selling an offsetting contract, in which case, it will realize a gain or a loss.

Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Adviser is inaccurate in its prediction of currency movements. The projection of short-term currency market movements is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and

the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and make delivery of the foreign currency. The use of forward contracts as a hedging technique does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does fix a rate of exchange in advance. Although forward contracts can reduce the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result from an increase in the value of the currencies. There is also the risk that the other party to the transaction may fail to deliver currency when due which may result in a loss to the Fund.

## **G. Leverage Transactions**

The Fund may use leverage to increase potential returns. Leverage exists when cash made available to the Fund through an investment technique is used to make additional Fund investments. Leverage transactions include borrowings for other than temporary or emergency purposes, purchasing securities on margin (borrowing money from a bank to purchase securities), selling securities short (selling securities that are not owned), lending portfolio securities, and entering into reverse repurchase agreements, dollar rolls and purchasing securities on a when-issued, delayed delivery or forward commitment basis.

Leverage involves special risks and may involve speculative investment techniques. The risks of leverage include a higher volatility of the NAV of the Fund's shares, which may be magnified by favorable or adverse market movements or changes in the cost of cash obtained by leveraging and the yield from invested cash. So long as the Fund is able to realize a net return on its investment portfolio that is higher than interest expense incurred, if any, leverage will result in higher current net investment income for the Fund than if the Fund were not leveraged. Changes in interest rates and related economic factors could cause the relationship between the cost of leverage and the yield to change, so that rates involved in the leveraging arrangement may substantially increase relative to the yield on the obligations in which the proceeds of the leveraging have been invested. To the extent that the interest expense involved in leveraging approaches the net return on the Fund's investment portfolio, the benefit of leveraging will be reduced. If the interest expense incurred as a result of leveraging were to exceed the net return to investors, the Fund's use of leverage would result in a lower rate of return than if the Fund were not leveraged. In an extreme case, if the Fund's current investment income were not sufficient to meet the interest expense of leveraging, it could be necessary for the Fund to liquidate some of its investments at an inappropriate time.

**Derivatives.** Derivatives are financial instruments that have a value which depends upon, or is derived from, the value of something else ("Reference Asset"), such as securities, commodities, futures, currencies or indexes. All derivatives can create leverage. Accordingly, relatively small price movements in a Reference Asset may result in a substantial loss or gain for the Fund.

**Options.** Options are derivatives. The Fund may purchase or write (sell) put and call options. A call option is a contract under which the purchaser of the call option, in return for paying a premium, has the right to buy the Reference Asset from the writer of the call option at a specified price (the "exercise price"). The writer of the call option, who received the premium, has the obligation to deliver the Reference Asset or the cash equivalent to the option purchaser upon exercise of the option. The "cash equivalent" is the difference between the exercise price and the (higher) market price. The Fund, as the writer of covered call options, will not benefit from any appreciation of the reference asset above the exercise price. In addition, when purchasing options that expire worthless (*i.e.*, not exercised), the Fund will lose the premium paid.

A put option is a contract under which the purchaser of the put option, in return for paying a premium, obtains the right to sell a Reference Asset to the writer of the put option at the exercise price. The writer of the put option, who received the premium, has the obligation to buy the Reference Asset from the purchaser of the put option or deliver the cash equivalent upon exercise of the option. The "cash equivalent" is the difference between the exercise price and the (lower) market price.

Options have expiration dates - meaning, they expire after a certain period. After the expiration date of an option, the option purchaser no longer has a right to exercise the option. Options normally have expiration dates of between three and nine months from the date written. "American style" options are exercisable at any time prior to the expiration date. "European style" options are exercisable only immediately prior to the expiration date. Writers of American style options have no control over when they may be required to fulfill their obligations under the options contract and thus are exposed to a timing risk.

Options may be traded on a U.S. or non-U.S. exchange or over-the-counter ("OTC"). Exchange-traded options are issued by a clearing organization, and the clearing organization essentially guarantees completion of every exchange-traded options transaction. In contrast, OTC options are contracts between two parties, such as the Fund and a counterparty. The Fund

is subject to “Counterparty Risk,” as described below, in connection with OTC options transactions: no party guarantees completion of such transactions; and there is no assurance that the Fund will be able to liquidate any OTC options position at any time prior to expiration. There is no assurance that a liquid market will exist for any options position into which the Fund enters. Even with respect to exchange-traded options, trading may be suspended on the exchange and prevent the Fund from closing out a position.

The premium charged to the purchaser of an option contract typically depends on the market value, if any, of the option as currently traded, the current market price and historic volatility of the Reference Asset, the difference between such market price and the exercise price, the length of the option period and the interest rate environment.

Prior to the exercise and expiration date of an options contract, purchasers and writers of options may close out their options position(s) by entering into an offsetting transaction in the same option series (type, exchange, underlying Reference Asset, exercise price and expiration). A closing purchase transaction cancels out the option writer’s position by means of an offsetting purchase of an identical option. Similarly, a closing sale transaction cancels out an option purchaser’s position by means of an offsetting sale of an identical option.

Transacting in options exposes the Fund to certain risks. For example, the skills and techniques applicable to options trading may not be the same as those applicable to trading securities, and the Fund may be adversely affected by the Adviser’s inability to accurately predict price movements in Reference Assets. To the extent that the Fund uses options on indices to execute its strategy or hedge its portfolio investments, changes in the value of the Reference Asset (*i.e.*, the index) may not correlate perfectly with (predicted) changes in the value of the portfolio. Further, options on foreign currencies are typically settled exclusively in the relevant foreign currency, and their value normally depends on the value of such currency relative to the U.S. dollar. To the extent that the U.S. options markets are closed while the market for the Reference Asset (foreign currency) is open, significant price and rate movements may occur that are not reflected in the U.S. options market.

Options transactions are subject to brokerage commissions or spreads, and the usage of options may result in a higher portfolio turnover rate and increased brokerage costs, which could reduce Fund returns. In addition, the use of options is subject to regulation, including by the SEC and options exchanges.

**Limits on Options.** The Fund will not hedge more than 90% of its total assets by writing call options and buying put options. In addition, the Fund will not purchase call options if the value of purchased call options would exceed 25% of the Fund’s total assets, and the Fund will not write put options if the value of such options exceeds 33% of the Fund’s total assets.

**Securities Lending and Repurchase Agreements.** The Fund may lend portfolio securities for income to brokers, dealers and other financial institutions. In a portfolio securities lending transaction, the Fund receives from the borrower an amount equal to the interest paid or the dividends declared on the loaned securities during the term of the loan and the interest on the collateral securities, less any fees (such as finders or administrative fees) that the Fund pays to arrange the loan. The Fund may share the interest that it receives on the collateral securities with the borrower. Loans are subject to termination at the option of the Fund or the borrower at any time, and the borrowed securities must be returned when the loan is terminated.

The Fund may pay fees to arrange for securities loans. The Fund may enter into repurchase agreements. Repurchase agreements are transactions in which the Fund purchases a security and simultaneously agrees to resell that security to the seller at an agreed-upon price on an agreed-upon future date, normally one to seven days later. If the Fund enters into a repurchase agreement, it will maintain possession of the purchased securities and any underlying collateral.

Securities loans and repurchase agreements must be continuously collateralized, and the collateral must have a market value at least equal to the value of the Fund’s loaned securities or, in the case of repurchase agreements, equal to the repurchase price of the securities, in either case plus accrued interest.

**Borrowing and Reverse Repurchase Agreements.** The Fund is permitted to borrow from any bank, so long as, immediately after such borrowings, there is an asset coverage of at least 300%. If the asset coverage falls below this percentage, the Fund shall reduce the amount of its borrowings within three days (excluding Sundays and holidays) so that asset coverage is at least 300%. The Fund may borrow money from a bank to, among other things, finance the purchase of securities for its portfolio. Pledging securities and purchasing securities on a when-issued, delayed-delivery or forward-delivery basis are subject to this limitation.

The Fund will not invest more than 5% of its net assets in reverse repurchase agreements. A reverse repurchase agreement is a transaction in which the Fund sells securities to a bank or securities dealer and simultaneously commits to repurchase

the securities from the bank or dealer at an agreed-upon date and at a price reflecting a market rate of interest unrelated to the sold securities. An investment of the Fund's assets in reverse repurchase agreements will increase the volatility of the Fund's NAV. A counterparty to a reverse repurchase agreement must be a primary dealer that reports to the Federal Reserve Bank of New York or one of the largest 100 commercial banks in the United States.

In a reverse repurchase agreement, the Fund sells portfolio securities to another party and agrees to repurchase the securities at an agreed-upon price and date, which reflects an interest payment. Reverse repurchase agreements involve the risk that the other party may fail to return the securities in a timely manner, or at all, which may result in losses to the Fund. The Fund could lose money if it is unable to recover the securities and the value of the collateral held by the Fund is less than the value of the securities. These events could also trigger adverse tax consequences to the Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold will decline below the price at which the Fund is obligated to repurchase them. Reverse repurchase agreements may be viewed as a form of borrowing by the Fund. When the Fund enters into a reverse repurchase agreement, any fluctuations in the market value of either the securities transferred to another party or the securities in which the proceeds may be invested would affect the market value of the Fund's assets. During the term of the reverse repurchase agreement, the Fund may also be obligated to pledge additional cash or securities in the event of a decline in the fair value of the transferred security.

**When-Issued Securities and Forward Commitments.** The Fund may purchase securities offered on a "when-issued" and "forward commitment" basis (including a delayed delivery basis). Securities purchased on a "when-issued" or "forward commitment basis" are securities not available for immediate delivery despite the fact that a market exists for those securities. A purchase is made on a "delayed delivery" basis when the transaction is structured to occur some time in the future.

When these transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. Normally, the settlement date occurs within two months after the transaction, but delayed settlements beyond two months may be negotiated. During the period between a commitment and settlement, no payment is made for the securities purchased by the purchaser and, thus, no interest accrues to the purchaser from the transaction. At the time the Fund makes the commitment to purchase securities on a when-issued basis, the Fund will record the transaction as a purchase and thereafter reflect the value each day of such securities in determining its NAV. No when-issued or forward commitments will be made by the Fund if, as a result, more than 10% of the Fund's total assets would be committed to such transactions.

**Dollar Roll Transactions.** Dollar roll transactions are transactions in which the Fund sells securities to a bank or securities dealer, and makes a commitment to purchase similar, but not identical, securities at a later date from the same party. During the period between the commitment and settlement, no payment is made for the securities purchased and no interest or principal payments on the securities accrue to the purchaser, however, the Fund assumes the risk of ownership. The Fund is compensated for entering into dollar roll transactions by the difference between the current sales price and the forward price for the future purchase, and by the interest earned on the cash proceeds of the initial sale. The Fund will engage in dollar roll transactions for the purpose of acquiring securities for their investment portfolios.

**Purchases on Margin.** The Fund may not purchase securities on margin, except that the Fund may use short-term credit for the clearance of transactions and may make margin deposits in connection with permitted transactions in options.

**Short Sales.** The Fund may use short sales for hedging and non-hedging purposes. To effect a short sale, the Fund borrows a security from or through a brokerage firm to make delivery to the buyer. The Fund is then obliged to replace the borrowed security by purchasing it at the market price at the time of replacement. Until the security is replaced, the Fund is required to pay the lender any dividends on the borrowed security and may be required to pay loan fees or interest.

The Fund may realize a gain if the security declines in price between the date of the short sale and the date on which the Fund replaces the borrowed security. The Fund will incur a loss if the price of the security increases between those dates. The amount of any gain will be decreased, and the amount of any loss will be increased, by the amount of any premium or interest the Fund is required to pay in connection with a short sale. A short position may be adversely affected by imperfect correlation between movements in the prices of the securities sold short and the securities being hedged. The Fund may also make short sales against-the-box, in which it sells short securities only if it owns or has the right to obtain without payment of additional consideration an equal amount of the same type of securities sold. The effect of short selling is similar to the effect of leverage. Short selling may amplify changes in the Fund's NAV. Short selling may also produce higher than normal portfolio turnover, which may result in increased transaction costs to the Fund.

The Fund may not enter into short sales if, as a result, more than 25% of the Fund's total assets would be so invested or the Fund's short positions (other than those positions "against the box") would represent more than 2% of the outstanding

voting securities of any single issuer or of any class of securities of any single issuer. For avoidance of doubt, options transactions are not treated as short sales.

**Senior Securities.** Senior securities are defined as Fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of Fund assets. Under Section 18(f)(1) of the 1940 Act, the Fund generally may not issue any class of senior security or sell any senior security of which it is the issuer, except that the Fund shall be permitted to borrow from any bank as described in this SAI (G. Leverage Transactions - Borrowing and Reverse Repurchase Agreements). In addition, under Rule 18f-4 under the 1940 Act, the Fund may expose up to 10% of its net assets to derivatives that are senior securities; or it may transact more significantly in such derivatives, subject to a value-at-risk test and the adoption and implementation of a derivatives risk management program. To the extent that the Fund engages in leverage or derivatives transactions that result in it issuing senior securities, it intends to do so in compliance with Rule 18f-4.

**CFTC Regulation.** An advisor of a fund trading commodity interests (such as futures contracts, options on futures contracts, non-deliverable forwards, swaps and cash-settled foreign currency contracts) is generally excluded from regulation as a commodity pool operator pursuant to Commodity Futures Trading Commission ("CFTC") Regulation 4.5. Under Regulation 4.5 exclusion, a fund's commodity interests (other than those used for bona fide hedging purposes as defined by the CFTC) must be limited so that the aggregate initial margin and premiums required to establish the positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options are in the money at the time of purchase) do not exceed 5% of the fund's NAV, or alternatively, the aggregate net notional value of the positions, determined at the time that the most recent position was established, does not exceed 100% of the fund's NAV (after taking into account unrealized profits and unrealized losses on any such positions). Further, to qualify for the exclusion in amended Regulation 4.5, a fund must satisfy a marketing test, which requires, among other things, that the fund not hold itself out as a vehicle for trading commodity interests. The Fund does not trade any commodity interests, such as futures contracts, options on futures contracts, non-deliverable forwards, swaps and cash-settled foreign currency contracts. Therefore, the Advisor does not need to, and does not, rely on the exclusion in CFTC Regulation 4.5 to avoid regulation as a commodity pool operator.

## **H. Illiquid and Restricted Securities**

The Fund may not acquire securities or invest in repurchase agreements if, as a result, more than 15% of the Fund's net assets (taken at current value) would be invested in illiquid securities. Generally, an illiquid security is any investment that may not reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid securities may be difficult for the Fund to value or dispose of due to the absence of an active trading market. Illiquid securities include unregistered and "restricted securities," and repurchase agreements maturing in greater than seven days.

"Restricted securities" generally are securities that may be resold to the public pursuant to an effective registration statement under the 1933 Act or an exemption from registration. Regulation S under the 1933 Act is one exemption from registration. It permits, under certain circumstances, the resale of restricted securities in offshore transactions. Rule 144A under the 1933 Act is another exemption. It permits the resale of certain restricted securities to qualified institutional buyers.

Since its adoption by the SEC in 1990, Rule 144A has facilitated trading of restricted securities among qualified institutional investors. To the extent restricted securities held by the Fund qualify under Rule 144A and an institutional market develops for those securities, the Fund expects that it will be able to dispose of the securities without registering the resale of such securities under the 1933 Act. However, to the extent that a robust market for such 144A securities does not develop, or a market develops but experiences periods of illiquidity, investments in Rule 144A securities could increase the level of the Fund's illiquidity.

Where an exemption from registration under the 1933 Act is unavailable, or where an institutional market is limited, the Fund may, in certain circumstances, be permitted to require the issuer of restricted securities held by the Fund to file a registration statement to register the resale of such securities under the 1933 Act. In such case, the Fund will typically be obligated to pay all or part of the registration expenses, and a considerable period may elapse between the decision to sell and the time the Fund may be permitted to resell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, or the value of the security were to decline, the Fund might obtain a less favorable price than prevailed when it decided to sell. Restricted securities for which no market exists are priced at fair value pursuant to a methodology approved by the Board.

**Determination of Liquidity.** Rule 22e-4 under the 1940 Act requires, among other things, that the Fund establish a liquidity risk management program ("LRMP") that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines "liquidity risk" as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors' interests in the fund. The Fund has implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of the Fund's LRMP administrator to administer such program and will review no less frequently than annually a written report prepared by the LRMP administrator that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a "highly liquid investment," "moderately liquid investment," "less liquid investment" or "illiquid investment." The liquidity risk classifications of the Fund's investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that the Fund investment is deemed to be an "illiquid investment" or a "less liquid investment," the Fund can expect to be exposed to greater illiquidity risk.

## **I. Investment Company Securities (including Exchange-Traded Funds) and Exchange-Traded Products**

The Fund at times may invest in shares of other investment companies and exchange-traded funds ("ETFs"), including open-end funds, closed-end funds, business development companies ("BDCs"), and interests in unit investment trusts. BDCs are a specialized form of closed-end fund that invest generally in small developing companies and financially troubled businesses. BDCs invest in private companies and thinly traded securities of public companies, including debt instruments. Generally, little public information exists for private and thinly traded companies and there is a risk that investors may not be able to make fully informed investment decisions. Many debt investments in which a BDC may invest will not be rated by a credit rating agency and will be below investment grade quality. Risks faced by BDCs include: competition for limited BDC investment opportunities; the liquidity of a BDC's private investments; uncertainty as to the value of a BDC's private investments; risks associated with access to capital and leverage; and reliance on the management of a BDC. The Fund's investments in BDCs are similar and include portfolio company risk, leverage risk, market and valuation risk, price volatility risk and liquidity risk.

The Fund may invest in investment company securities advised by the Fund's adviser or sub-adviser. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with the Fund's own operations. These other fees and expenses are reflected as Acquired Fund Fees and Expenses and are included in the Fees and Expenses Table for the Fund in its Prospectus, if applicable. Investment in other investment companies may involve the payment of substantial premiums above the value of such issuer's portfolio securities.

An investment in an ETF generally presents the same primary risks as an investment in a conventional mutual fund (*i.e.*, one that is not exchange-traded) that has the same investment objective, strategies, and policies. The price of an ETF can fluctuate within a wide range, and the Fund could lose money investing in an ETF if the prices of the securities owned by the ETF go down. In addition, because ETFs are traded on an exchange, ETFs are subject to the following risks that do not apply to conventional funds: (1) investments in ETPs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund; (2) the market price of the ETF's shares may trade at a discount or premium to their NAV per share; (3) an active trading market for an ETF's shares may not develop or be maintained; and (4) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

Under Section 12(d)(1)(A) of the 1940 Act, however, the Fund's investments in such securities are generally limited to 3% of the outstanding voting stock of any one company, 5% of the Fund's total assets in any one company, and 10% of the Fund's total assets in investment companies generally.

There are, however, several exceptions to these "3/5/10 limits." For example, under Section 12(d)(1)(F) of the 1940 Act, the Fund may invest more than 5% of its total assets in another investment company and more than 10% of its total assets among multiple investment companies, provided that it and its affiliates limit their investment in an acquired fund to 3% of the acquired fund's outstanding voting securities and the investing fund limits any sales load it charges to 1.5%. Further, the investing fund must comply with certain redemption and voting restrictions. The Fund may also rely on Rule 12d1-4 under the 1940 Act to invest in acquired funds, and under Rule 12d1-4, acquired funds themselves may invest up to 10% of their assets in other funds.

In addition to investing in other funds, the Fund may invest in exchange-traded products (“ETPs”) other than ETFs, including exchange-traded notes (“ETNs”). ETNs are different from ETFs in that they are not secured by an underlying pool of assets, but rather are notes (or debt securities) secured only by the ability of the issuer to pay.

The Fund may also invest in ETPs that are neither ETFs nor ETNs. Such ETPs may be organized as commodity pools registered under the Commodity Exchange Act or as grantor trusts. Such ETPs are not registered under the 1940 Act because they invest in, for example, commodities or currencies rather than securities. If the Fund invests in an ETP, including an ETN, it will be subject to substantially similar risks as are discussed above regarding ETFs. Notably, however, the 3/5/10 limits only apply to ETPs that are ETFs. Other types of ETPs are not subject to the 3/5/10 limits. There are, however, other risks associated with investments in ETPs, which, are detailed below in “Taxation - Certain Tax Rules Applicable to the Fund’s Transactions.”

## **J. Temporary Defensive Position and Cash Investments**

For temporary defensive purposes, or to manage cash pending investment or payout, the Fund may invest up to 100% of its total assets in cash or cash equivalents in money market instruments. The Fund also may invest in money market instruments to increase liquidity or to provide collateral for margin and similar purposes. Such investments typically offer less potential for gain than other types of investments and may prevent the Fund from achieving its investment objective.

“Money market instruments” are U.S. government securities and high-quality, short-term debt securities that typically have remaining maturities of one year or less. Securities will be considered “high-quality” if they are rated in one of the two highest short-term rating categories or, if not rated, determined by the Advisor to be of comparable quality. Money market instruments include certain U.S. government and agency securities, short-term corporate securities and commercial paper, bankers’ acceptances and certificates of deposit issued by domestic banks, corporate notes, money market funds and repurchase agreements collateralized by the foregoing.

Although money market instruments usually have fixed rates of return, the Fund may invest in money market instruments that have variable or floating rates of interest, such as master demand notes. Master demand notes permit investment of fluctuating amounts at varying rates of interest pursuant to a direct arrangement with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days’ notice. Generally, these obligations are not traded, nor is there an established secondary market for them. To the extent that a demand note does not have a seven-day or shorter demand feature and there is no readily available market for it, it will be treated by the Fund as an illiquid security.

## **K. Market Turbulence**

The greatest risk of investing in a mutual fund is that its returns will fluctuate, and you could lose money. Turbulence in the financial sector may result in an unusually high degree of volatility in the financial markets. Both domestic and foreign equity markets have experienced significant volatility and turmoil, with issuers that have exposure to the real estate, mortgage and credit markets particularly affected. It is uncertain whether or for how long these conditions could occur.

Reduced liquidity in credit and fixed-income markets may adversely affect many issuers worldwide. This reduced liquidity may result in less money being available to purchase raw materials, goods and services from emerging markets, which may, in turn, bring down the prices of these economic staples. It may also result in emerging market issuers having more difficulty obtaining financing, which may, in turn, cause a decline in their stock prices. These events and possible market turbulence may have an adverse effect on the Fund.

The financial markets in which the Fund invests are subject to price volatility that could cause losses in the Fund. Market volatility may result from varied predictable and unpredictable factors. The impact of infectious diseases in certain regions or countries may perform better or worse due to the nature or level of their public health response or due to other factors. Health crises caused by infectious diseases may exacerbate other pre-existing political, social and economic risks in certain countries.

The impact of epidemics and/or pandemics may affect the economies of many nations, individual companies and the global securities and commodities markets, including their liquidity, in ways that cannot necessarily be foreseen at the present time. The impact of any outbreak may last for an extended period of time. Epidemics and pandemics that may arise in the future could result in continued volatility in the financial markets and lead to increased levels of Fund redemptions, which could have a negative impact on the Fund and could adversely affect the Fund’s performance, resulting in losses to your investment.

Although interest rates were unusually low in recent years in the U.S. and abroad, recently, the Federal Reserve and certain foreign central banks began to raise interest rates as part of their efforts to address rising inflation. In addition, ongoing inflation pressures from tight labor markets and supply chain disruptions could continue to cause an increase in interest rates and/or negatively impact companies. It is difficult to accurately predict the pace at which interest rates might increase, or the timing, frequency or magnitude of any such increases in interest rates. Additionally, various economic and political factors could cause the Federal Reserve or other foreign central banks to change their approach in the future and such actions may result in an economic slowdown both in the U.S. and abroad. Unexpected increases in interest rates could lead to market volatility or reduce liquidity in certain sectors of the market. Deteriorating economic fundamentals may, in turn, increase the risk of default or insolvency of particular issuers, negatively impact market value, cause credit spreads to widen, and reduce bank balance sheets. Any of these could cause an increase in market volatility or reduce liquidity across various markets. Also, regulators have expressed concern that rate increases may cause investors to sell fixed income securities faster than the market can absorb them, contributing to price volatility. Over the longer term, rising interest rates may present a greater risk than has historically been the case due to the prior period of relatively low rates and the effect of government fiscal and monetary policy initiatives and potential market reaction to those initiatives, or their alteration or cessation. Historical patterns of correlation among asset classes may break down in unanticipated ways during times of high volatility, disrupting investment programs and potentially causing losses.

High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. There is no assurance that the U.S. Congress will act to raise the nation's debt ceiling; a failure to do so could cause market turmoil and substantial investment risks that cannot now be fully predicted. Unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy.

In addition, global climate change may have an adverse effect on property and security values. A rise in sea levels, an increase in powerful storms and/or an increase in flooding could cause coastal properties to lose value or become unmarketable altogether. Economists warn that, unlike previous declines in the real estate market, properties in affected coastal zones may never recover their value. Large wildfires have devastated, and in the future may devastate, entire communities and may be very costly to any business found to be responsible for the fire or conducting operations in affected areas. The current U.S. administration may focus regulatory and public works projects around climate change concerns. Regulatory changes and divestment movements tied to concerns about climate change could adversely affect the value of certain land and the viability of industries whose activities or products are seen as accelerating climate change. Losses related to climate change could adversely affect corporate borrowers and mortgage lenders, the value of mortgage-backed securities, the bonds of municipalities that depend on tax revenues and tourist dollars generated by such properties, and insurers of the property and/or of corporate, municipal or mortgage-backed securities. Since property and security values are driven largely by buyers' perceptions, it is difficult to know the time period over which these effects might unfold.

Russia's military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict have had, and could continue to have, severe adverse effects on regional and global economies and could further increase volatility and uncertainty in the financial markets. The United States and other countries have imposed economic sanctions on Russia and certain Russian individuals, banking entities and corporations as a response to its invasion of Ukraine. The United States and other countries have also imposed economic sanctions on Belarus and may impose sanctions on other countries in the future. These sanctions, as well as any other economic consequences related to the invasion, such as additional sanctions, boycotts or changes in consumer or purchaser preferences or cyberattacks on governments, companies or individuals, may further decrease the value and liquidity of certain Russian securities and securities of issuers in other countries that are subject to economic sanctions related to the invasion. To the extent that the Fund has exposure to Russian investments or investments in countries affected by the invasion, the Fund's ability to price, buy, sell, receive or deliver such investments may be impaired. In addition, any exposure that the Fund may have to counterparties in Russia or in countries affected by the invasion could negatively impact the Fund's investments. The extent and duration of military actions and the repercussions of such actions (including any retaliatory actions or countermeasures that may be taken by those subject to sanctions) are impossible to predict. Apparently stable systems have experienced and may again experience periods of disruption and/or improbable reversals of policy. These events have resulted in, and could continue to result in, significant market disruptions, a reordering of global relationships, strain on global supply chains, inflation and a slowing of global growth. These and any related events could significantly impact the Fund's performance and the value of an investment in the Fund beyond any direct exposure the Fund may have to Russian issuers or issuers in other countries directly or indirectly affected by the invasion, the ongoing war between Russia and Ukraine and/or efforts to reestablish peace in the region, which may have collateral impacts across Europe and globally.

## **L. Master Limited Partnerships**

The Fund may invest in publicly traded partnerships such as master limited partnerships (“MLPs”). MLPs issue units that are registered with the SEC and are freely tradable on a securities exchange or in the over-the-counter market. An MLP may have one or more general partners, who conduct the business, and one or more limited partners, who contribute capital. The general partners are jointly and severally responsible for the liabilities of the MLP. The Fund invests as a limited partner, and normally would not be liable for the debts of an MLP beyond the amounts the Fund has contributed but it would not be shielded to the same extent that a shareholder of a corporation would be. In certain instances, creditors of an MLP would have the right to seek a return of capital that had been distributed to a limited partner. The right of an MLP’s creditors would continue even after the Fund had sold its investment in the partnership. MLPs typically invest in real estate, oil and gas equipment leasing assets, but they also finance entertainment, research and development, and other projects.

Additionally, MLPs do not pay U.S. federal income tax at the partnership level and instead allocate a share of the partnership’s income, gains, losses, deductions and expenses to each partner. A change in current tax law, or a change in the underlying business mix of a given MLP, could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. The classification of an MLP as a corporation for income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund were treated as a corporation for U.S. federal income tax purposes, it could result in a reduction of the value of the Fund’s investment in the MLP as well as decreased income, and consequently a reduction in the value of an investment in the Fund. In addition, if the Fund were to invest more than 25% of its total assets in MLPs taxed as partnerships this could cause the Fund to lose its status as a RIC.

## **M. Cyber-Security Risk**

The Fund, and its service providers, may be prone to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or its third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund’s service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by its service providers or any other third parties whose operations may affect the Fund or its shareholders. Similar types of cyber security risks are also present for issues or securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund’s investment in such companies to lose value.

## **N. Large Shareholder Transaction Risk**

The Fund may experience adverse effects when a large shareholder redeems or purchases large amounts of shares of the Fund. Such redemptions may cause the Fund to sell securities at times when it would not otherwise do so, disrupt the Fund’s operations, or borrow money (at a cost to the Fund), which may negatively impact the Fund’s performance and liquidity. Similarly, large purchases may adversely affect the Fund’s performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs.

## INVESTMENT LIMITATIONS

---

The Trust, on behalf of the Fund, has adopted the following investment policies which are fundamental policies that may not be changed without the affirmative vote of a majority of the outstanding voting securities of the Fund. “The vote of a majority of the outstanding voting securities of the Fund,” as defined by the 1940 Act, means the vote, at the annual or a special meeting of the security holders of the Fund duly called, (A) of 67 per centum or more of the voting securities present at such meeting, if the holders of more than 50 per centum of the outstanding voting securities of the Fund are present or represented by proxy; or (B) of more than 50 per centum of the outstanding voting securities of the Fund, whichever is the less.

The Fund’s investment objective is a fundamental policy and therefore may not be changed without shareholder approval.

For purposes of the Fund’s investment limitations, all percentage limitations apply immediately after an investment. Except with respect to borrowing money, if a percentage limitation is adhered to at the time of an investment, a later increase or decrease in the percentage resulting from any change in value or net assets will not result in a violation of such restrictions. If at any time the Fund’s borrowings exceed its limitations due to a decline in net assets, such borrowings will be reduced within three days (excluding Sundays and holidays) to the extent necessary to comply with the limitation.

**Fundamental Limitations.** The Fund has adopted the following fundamental investment limitations.

### **The Fund may not:**

#### **1. Borrowing Money**

Borrow money if, as a result, outstanding borrowings would exceed an amount equal to 33⅓% of the Fund’s total assets. The following are not subject to this limitation to the extent they are fully collateralized: (1) the delayed delivery of purchased securities (such as the purchase of when-issued securities); (2) reverse repurchase agreements and (3) dollar-roll transactions.

#### **2. Concentration**

Purchase securities, other than U.S. Government Securities, repurchase agreements covering U.S. Government Securities or securities of other regulated investment companies, if, immediately after each purchase, more than 25% of the Fund’s total assets taken at market value would be invested in securities of issuers conducting their principal business activity in the same industry.

For purposes of determining industry concentration: (1) there is no limit on investments in tax-exempt securities issued by the states, territories or possessions of the U.S. or foreign government securities; and (2) the Fund treats the assets of investment companies in which it invests as its own except to the extent that the Fund invests in other investment companies pursuant to Section 12(d)(1)(A) of the 1940 Act.

#### **3. Diversification**

With respect to 75% of its assets, purchase a security (other than a U.S. Government Security or a security of an investment company) if, as a result: (1) more than 5% of the Fund’s total assets would be invested in the securities of a single issuer; or (2) the Fund would own more than 10% of the outstanding voting securities of any single issuer.

#### **4. Underwriting Activities**

Underwrite (as that term is defined in the 1933 Act) securities issued by other persons except, to the extent that in connection with the disposition of the Fund’s assets, the Fund may be deemed to be an underwriter.

#### **5. Making Loans**

Make loans to other parties. For purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt security are not deemed to be the making of loans.

## **6. Purchases and Sales of Real Estate**

Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other instruments backed by real estate or securities of companies engaged in the real estate business).

## **7. Purchases and Sales of Commodities**

Purchase or sell physical commodities unless acquired as the result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options and futures contracts or from investing in securities or other instruments backed by physical commodities).

## **8. Issuance of Senior Securities**

Issue senior securities except to the extent permitted by the 1940 Act.

With respect to the fundamental policy relating to borrowing money set forth in section (1) above, the 1940 Act permits the Fund to borrow money in amounts of up to 33⅓% of the Fund's total assets, at the time of borrowing, from banks for any purpose (the Fund's total assets include the amounts being borrowed). To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an asset coverage of at least 300% of the amount of its borrowings (not including borrowings for temporary purposes in an amount not exceeding 5% of the value of the Fund's total assets). In the event that asset coverage falls below this percentage, the Fund is required to reduce the amount of its borrowings within three days (not including Sundays and holidays) so that the asset coverage is restored to at least 300%. Asset coverage means the ratio that the value of the Fund's total assets (including amounts borrowed), minus liabilities other than borrowings, bears to the aggregate amount of all borrowings.

With respect to the fundamental policy relating to making loans set forth in section (5) above, the 1940 Act does not prohibit the Fund from making loans; however, SEC staff interpretations currently prohibit registered investment companies from lending more than one-third of their total assets, except through the purchase of debt obligations.

With respect to the fundamental policy relating to investing in real estate set forth in section (6) above, the Fund may, to the extent permitted by applicable law, invest in securities or other instruments directly or indirectly secured by real estate and invest in securities or other instruments issued by issuers that invest in real estate. Investments in securities of issuers that are exposed to or invested in the real estate business will not be deemed to be a purchase or sale of real estate.

With respect to the fundamental policy relating to issuing senior securities set forth in section (8) above, "senior securities" are defined as Fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of Fund assets. The 1940 Act prohibits the Fund from issuing any class of senior securities or selling any senior securities of which it is the issuer, except that the Fund is permitted to borrow from a bank if consistent with the fundamental policy set forth in section (1) above.

### A. Board of Trustees

The Trust is governed by its Board of Trustees (the “Board” or “Trustees”). The Board oversees the management and operations of the Trust and the Fund, in accordance with federal law, Delaware law and the stated policies of the Fund. The Board oversees the Trust’s officers and service providers, including the Adviser, which is responsible for the management of the day-to-day operations of the Fund based on policies and agreements reviewed and approved by the Board. In carrying out these responsibilities, the Board regularly interacts with and receives reports from senior personnel of service providers and the Trust’s Chief Compliance Officer (“CCO”). The Board also is assisted by the Trust’s independent auditor (which reports directly to the Trust’s Audit Committee), independent counsel and other experts as appropriate. The Trustees serve until their respective successors have been elected and qualified or until their earlier death, resignation or removal.

The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series. As a result, the term “Fund Complex” applies only to the Fund.

**Board Structure and Related Matters.** Independent Trustees constitute at least a majority of the Board members. An Independent Trustee serves as Independent Chair of the Board. The Independent Chair’s responsibilities include: setting an agenda for each meeting of the Board; presiding at all meetings of the Board and Independent Trustees; and serving as a liaison with other Trustees, the Trust’s officers, other management personnel and counsel to the Fund. The Independent Chair also performs such other duties as the Board may from time to time determine.

The Trustees discharge their responsibilities collectively as a Board, as well as through Board committees, each of which operates pursuant to a charter or procedures approved by the Board that delineates the specific responsibilities of that committee. The Board has established three standing committees: the Audit Committee, the Nominating Committee and the Qualified Legal Compliance Committee. The members and responsibilities of each Board committee are summarized below.

The Board periodically evaluates its structure and composition as well as various aspects of its operations. The Board believes that its leadership structure, including its Independent Chair position and its committees, is appropriate for the Trust in light of, among other factors, the asset size and nature of the Fund, the number of funds overseen by the Board, the arrangements for the conduct of the Fund’s operations, the number of Trustees and the Board’s responsibilities. On an annual basis, the Board conducts a self-evaluation that considers, among other matters, whether the Board and its committees are functioning effectively and whether, given the size and composition of the Board and each of its committees, the Trustees are able to oversee effectively the number of funds.

The Board holds four regularly scheduled meetings each year, which are normally expected to be in person. The Board may hold special meetings, as needed, either in person or by telephone, to address matters arising between regular meetings. At least once per quarter, during a regularly scheduled meeting of the Board, the Independent Trustees meet without the presence of interested Trustees.

The Trustees are identified in the table below, which provides information as to their principal business occupations held during the last five years and certain other information. Each Trustee serves until his or her death, resignation or removal. The address for all Trustees is c/o Apex Fund Services, 190 Middle Street, Suite 101, Portland, Maine 04101. John Y. Keffer, a former Trustee of the Trust, has been appointed as a Trustee Emeritus by the Board. As Trustee Emeritus, Mr. Keffer will not have a vote with respect to Trust matters; however, Mr. Keffer may attend Board meetings.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Series in Fund Complex Overseen By Trustee	Other Directorships Held By Trustee During Past Five Years
<b>Independent Trustees</b>					
David Tucker Born: 1958	Trustee; Chairman of the Board	Since 2011 and Chairman since 2018	Director, Blue Sky Experience (a charitable endeavor) since 2008; Senior Vice President & General Counsel, American Century Companies (an investment management firm) 1998-2008.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Mark D. Moyer Born: 1959	Trustee	Since 2018	Independent consultant providing interim CFO services, principally to non-profit organizations, 2011-2017, and since 2023; Chief Financial Officer, Freedom House (a NGO advocating political freedom and democracy) 2017-2021.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Jennifer Brown-Strabley Born: 1964	Trustee	Since 2018	Principal, Portland Global Advisors (a registered investment adviser) 1996-2010.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
<b>Interested Trustees<sup>(1)</sup></b>					
Karen Shaw Born: 1972	Trustee	Since 2023	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.	1	Trustee, Forum Funds II and U.S. Global Investors Funds

<sup>(1)</sup>Karen Shaw is currently an interested person of the Trust, as defined in the 1940 Act, due to her affiliation with Apex Fund Services and her roles as Treasurer and Principal Financial Officer of the Trust.

In addition to the information set forth in the table above, each Trustee possesses other relevant qualifications, experience, attributes or skills. The following provides additional information about these qualifications and experience.

**David Tucker:** Mr. Tucker has extensive experience in the investment management industry, including experience in senior management, legal and compliance roles at two large mutual fund complexes; service on various committees of the Investment Company Institute (“ICI”); and director of ICI Mutual (a mutual insurance company sponsored by the investment company industry), including service as chairman of the underwriting, risk and fraud committees of ICI Mutual’s board of directors. Mr. Tucker actively serves charitable organizations in the metropolitan Kansas City area.

**Mark D. Moyer:** Mr. Moyer has extensive experience with finance. He has served as chief financial officer for several non-governmental organizations and a publicly-listed integrated media company. Mr. Moyer also served as an adjunct professor of accounting at Fairfield University.

**Jennifer Brown-Strabley:** Ms. Brown-Strabley has extensive experience in the financial services and investment management industry, including institutional sales experience in global fixed-income and related quantitative research. Ms. Brown-Strabley also has experience in business start-up and operations and as a former principal of a registered investment adviser, for which she continues to provide consulting advice from time to time.

**Karen Shaw:** Ms. Shaw has extensive experience in the fund services industry, including management roles in mutual fund operations, financial and regulatory reporting. Ms. Shaw’s experience also includes testing and implementation, project

management and client management. Ms. Shaw has a deep understanding of pooled investment products, including mutual fund governance, operations and reporting.

**Risk Oversight.** Consistent with its responsibility for oversight of the Trust and the Fund, the Board oversees the management of risks relating to the administration and operation of the Trust and the Fund. The Adviser, as part of its responsibilities for the day-to-day operations of the Fund, is responsible for day-to-day risk management. The Board, in the exercise of its reasonable business judgment, also separately considers potential risks that may impact the Fund. The Board performs this risk management oversight directly and, as to certain matters, through its committees (described below) and through the Independent Trustees. The following provides an overview of the principal, but not all, aspects of the Board's oversight of risk management for the Trust and the Fund.

In general, the Fund's risks include, among others, investment risk, valuation risk, compliance risk and operational risk. The Board has adopted, and periodically reviews, policies and procedures designed to address these and other risks to the Trust and the Fund. In addition, under the general oversight of the Board, the Adviser and other service providers have themselves adopted a variety of policies, procedures and controls designed to address particular risks. Different processes, procedures and controls are employed with respect to different types of risks. Further, the Adviser oversees and regularly monitors the investments, operations and compliance of the Fund's investments.

The Board also oversees risk management for the Trust and the Fund through review of regular reports, presentations and other information from officers of the Trust and other persons. Senior officers of the Trust, senior officers of the Adviser and the CCO regularly report to the Board on a range of matters, including those relating to risk management. In this regard, the Board periodically receives reports regarding other service providers to the Trust, either directly or through the CCO. On at least a quarterly basis, the Independent Trustees meet with the CCO to discuss matters relating to the Fund's compliance program. Further, at least annually, the Board receives a report from the CCO regarding the effectiveness of the Fund's compliance program.

The Board has designated the Adviser as the valuation designee pursuant to Rule 2a-5 under the 1940 Act, and delegated to the Adviser the responsibility for making fair value determinations with respect to the Fund's portfolio securities. The Adviser, as the valuation designee, is responsible for periodically assessing any material risks associated with the determination of the fair value of the Fund's investments; establishing and applying fair value methodologies; testing the appropriateness of fair value methodologies; and overseeing and evaluating third-party pricing services. The Adviser, as valuation designee, carries out its fair valuation responsibilities pursuant to and procedures approved by the Board. The Adviser, as valuation designee, reports to the Board on the pricing of the Fund's shares and the valuation of the Fund's portfolio securities; recommends independent pricing services to provide a value for Fund assets; makes and monitors fair value determinations pursuant to the valuation policies and procedures; and carries out any other functions designated to the Adviser relating to the valuation of Fund assets.

The Board also regularly receives reports from the Adviser with respect to the investments and securities trading of the Fund. For example, typically, the Board receives reports, presentations and other information from the Adviser on at least an annual basis in connection with the Board's consideration of the renewal of the investment advisory agreement between the Adviser and the Trust on behalf of the Fund (the "Advisory Agreement"). Also, if applicable, the Board receives reports from the Adviser and other service providers in connection with the Board's consideration of the renewal of any distribution plan of the Fund under Rule 12b-1 under the 1940 Act. Senior officers of the Trust and senior officers of the Adviser also report regularly to the Audit Committee on valuation matters, internal controls and accounting and financial reporting policies and practices. In addition, the Audit Committee receives regular reports from the Trust's independent auditors on internal control and financial reporting matters.

**Trustee Ownership in the Fund and the Fund Complex.** The following table sets forth each Trustee's ownership of the Fund and the Fund Complex as of December 31, 2024.

Trustees	Dollar Range of Beneficial Ownership in the Fund	Aggregate Dollar Range of Ownership in all Registered Investment Companies Overseen by Trustee in the Fund Complex
<b>Independent Trustees</b>		
David Tucker	None	None
Mark D. Moyer	None	None
Jennifer Brown-Strabley	None	None
<b>Interested Trustee</b>		
Karen Shaw	None	None

## B. Principal Officers of the Trust

The officers of the Trust conduct and supervise its daily business. As of the date of this SAI, the officers of the Trust, their years of birth and their principal occupations during the past five calendar years are set forth below. Each officer serves until his or her death, resignation or removal and replacement. The business address of each officer is c/o Apex Fund Services, 190 Middle Street, Suite 101, Portland, Maine 04101.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years
Zachary Tackett Born: 1988	President; Principal Executive Officer; Anti-Money Laundering Compliance Officer; Identity Theft Prevention Officer	President and Principal Executive Officer since 2023; Anti-Money Laundering Compliance Officer and Identity Theft Prevention Officer since 2014; Vice President and Secretary, 2014-2023	Senior Counsel, Apex Fund Services since 2019; Counsel, Atlantic Fund Services 2014-2019.
Karen Shaw Born: 1972	Treasurer; Principal Financial Officer	Since 2008	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.
Carlyn Edgar Born: 1963	Chief Compliance Officer and Vice President	Chief Compliance Officer 2008-2016 and 2021-current; Vice President since 2008	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.
Lindsey Dorval Born: 1981	Vice President; Secretary	Since 2023	Counsel, Apex Funds Services since 2020.

## C. Ownership of Securities of the Adviser and Related Companies

As of December 31, 2024, no Independent Trustee (or any of his or her immediate family members) owned beneficially or of record, securities of any Trust investment adviser, the Trust's principal underwriter, or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with any Trust investment adviser or principal underwriter.

## D. Information Concerning Trust Committees

**Audit Committee.** The Trust's Audit Committee, which typically meets quarterly, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Audit Committee assists the Board in fulfilling its responsibility for oversight of the quality and integrity of the accounting, auditing and financial reporting practices of the Trust. It is directly responsible for the appointment, termination, compensation and oversight of work of the independent auditors to the Trust. In so doing, the Audit Committee reviews the methods, scope

and results of the audits and audit fees charged and reviews the Trust's internal accounting procedures and controls. During the fiscal year ended December 31, 2024, the Audit Committee met four times.

**Nominating Committee.** The Trust's Nominating Committee, which meets when necessary, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Nominating Committee is charged with the duty of nominating all Trustees and committee members and presenting these nominations to the Board. The Nominating Committee will not consider any nominees for Trustee recommended by security holders. During the fiscal year ended December 31, 2024, the Nominating Committee did not meet.

**Qualified Legal Compliance Committee.** The Qualified Legal Compliance Committee (the "QLCC"), which meets when necessary, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. The QLCC evaluates and recommends resolutions to reports from attorneys servicing the Trust regarding evidence of material violations of applicable federal and state law or the breach of fiduciary duties under applicable federal and state law by the Trust or an employee or agent of the Trust. During the fiscal year ended December 31, 2024, the QLCC did not meet.

#### **E. Compensation of Trustees and Officers**

For the year ended December 31, 2024, each Trustee was paid an annual fee of \$45,000 for service to the Trust, and the Chairman of the Board was paid an annual fee of \$55,000. The Chairman of the Audit Committee was paid an additional annual fee of \$2,000. Effective January 1, 2025, each Independent Trustee's annual retainer is \$60,000 (\$70,000 for the Chairman), and the Audit Committee Chairman receives an additional \$5,000 annually. The Trustees and Chairman may receive additional fees for special Board meetings. Each Trustee is also reimbursed for all reasonable out-of-pocket expenses incurred in connection with his or her duties as a Trustee, including travel and related expenses incurred in attending Board meetings. No officer of the Trust is compensated by the Trust, but officers are reimbursed for travel and related expenses incurred in attending Board meetings held outside of Portland, Maine.

The following table sets forth the fees paid to each Trustee by the Fund and the Fund Complex for the fiscal year ended December 31, 2024.

<b>Trustee</b>	<b>Aggregate Compensation from the Fund</b>	<b>Pension or Retirement Benefits Accrued as part of Fund Expenses</b>	<b>Total Compensation from Fund Complex</b>
<b>Independent Trustees</b>			
David Tucker	\$7,323	N/A	\$7,323
Mark D. Moyer	\$6,258	N/A	\$6,258
Jennifer Brown-Strabley	\$5,991	N/A	\$5,991
<b>Interested Trustee</b>			
Karen Shaw	\$0	N/A	\$0

#### **F. Investment Adviser**

**Services of Adviser.** The Adviser serves as investment adviser to the Fund pursuant to the Advisory Agreement. Under the Advisory Agreement, the Adviser furnishes, at its own expense, all services, facilities, and personnel necessary in connection with managing the Fund's investments and effecting portfolio transactions for the Fund. The Adviser may compensate brokers or other service providers ("Financial Intermediaries") out of its own assets, and not as additional charges to the Fund, in connection with the sale and distribution of shares of the Fund and/or servicing of these shares.

**Ownership of Adviser.** The Adviser is privately owned by Polaris Capital Management Holdings LLP; an entity owned by Polaris Capital Management LLC President, Bernard R. Horn, Jr. and family.

**Information Concerning Accounts Managed by Portfolio Managers.** The following table provides information regarding other accounts managed by the portfolio managers as of December 31, 2024:

Name of Portfolio Manager	Number of Other Accounts Managed and Assets by Account Type <sup>(1)</sup>			Number of Accounts and Assets for Which Advisory Fee is Performance-Based		
	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts
Bernard R. Horn, Jr.	6 accounts \$4.17 billion	6 accounts \$1.27 billion	18 accounts \$2.93 billion	None	None	1 account \$114.6 million
Bin Xiao	6 accounts \$4.17 billion	6 accounts \$1.27 billion	18 accounts \$2.93 billion	None	None	1 account \$114.6 million
Jason Crawshaw	6 accounts \$4.17 billion	6 accounts \$1.27 billion	18 accounts \$2.93 billion	None	None	1 account \$114.6 million

<sup>1</sup> All of the accounts listed above are managed by Messrs. Horn, Xiao and Crawshaw together.

**Conflicts of Interest.** Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with the following conflicts:

- The management of multiple client accounts may result in a portfolio manager devoting unequal time and attention to the management of the Fund. The Adviser may seek to manage such competing interests for the time and attention of the portfolio managers by having the portfolio managers focus on a particular investment discipline.
- If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one account, the Fund may be unable to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible accounts. To deal with these situations, the Adviser has adopted procedures for allocating portfolio transactions across multiple accounts.
- With respect to securities transactions for the Fund, the Adviser determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as other pooled investment vehicles that are not registered mutual funds and other accounts managed for organizations and individuals), the Adviser may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, the Adviser may place separate, non-simultaneous transactions for the Fund and another account which may temporarily affect the market price of the security or the execution of the transaction, or both, to the detriment of the Fund or the other account.
- Finally, the appearance of a conflict of interest may arise if the Adviser has an incentive, such as a performance-based management fee, which relates to the management of one fund or account but not all funds and accounts with respect to which a portfolio manager has day-to-day management responsibilities.

The Adviser has adopted certain compliance procedures, which are designed to address these types of conflicts. The Adviser has developed and implemented policies and procedures designed to ensure that all clients are treated equitably. In addition, compliance oversight and monitoring ensures adherence to policies designed to avoid conflicts. The Adviser's policies and procedures address trade aggregation and allocation. Additionally, given the nature of the Adviser's investment process and its Fund and/or other accounts, the Adviser's investment management team services are typically applied collectively to the management of all the Funds and/or other accounts following the same strategy.

Compensation of the Adviser's portfolio managers is not based upon performance of the Fund managed by the Adviser. To mitigate the potential conflict of having a team member favor one Fund over another Fund and/or other account, the Adviser has established procedures, including policies to monitor trading and best execution for all funds and/or other accounts. No individual fund or portfolio performance is solely or directly responsible for determining compensation; rather, compensation is based, at least in part, on the portfolio manager's performance of certain firmwide mandates (on a

weighted, blended basis) against relevant benchmark performance and risk measures, which is aggregated and factored into compensation methodologies.

There is no guarantee that such procedures will detect each and every situation in which a conflict arises.

**Information Concerning Compensation of Portfolio Managers.** For the period ending December 31, 2024, Messrs. Horn, Xiao and Crawshaw were compensated by the Adviser based on a fixed salary plus a bonus. This bonus was based on the overall profitability of the Adviser based on assets under management and performance of overall firm mandates.

**Portfolio Manager Ownership in the Fund.** The Adviser has provided the following information regarding each portfolio manager's ownership in the Fund as of December 31, 2024:

<b>Portfolio Manager</b>	<b>Dollar Range of Beneficial Ownership in the Fund as of December 31, 2024</b>
Bernard R. Horn, Jr.	Over \$1,000,000
Bin Xiao	\$100,001 - \$500,000
Jason Crawshaw	Over \$1,000,000

**Fees.** Subject to the general oversight of the Board, the Adviser makes investment decisions for the Fund pursuant to an investment advisory agreement between the Adviser and the Trust, on behalf of the Fund (the "Advisory Agreement"). The Adviser receives an advisory fee from the Fund at an annual rate equal to 1.00% of the Fund's average annual daily net assets under the terms of the Advisory Agreement. The actual advisory fee rate retained by the Adviser for the fiscal year ended December 31, 2024 was 0.79%. The Adviser has contractually agreed to waive its fee and/ or reimburse Fund expenses to limit the Fund's Total Annual Fund Operating Expenses (excluding all taxes, interest, portfolio transaction expenses, dividend and interest expense on short sales, acquired fund fees and expenses, proxy expenses and extraordinary expenses) to 0.99% through April 30, 2026 ("Expense Cap"). The Expense Cap may only be raised or eliminated with the consent of the Board of Trustees. The Adviser may recoup from the Fund fees waived and expenses reimbursed by the Adviser pursuant to the Expense Cap if such recoupment is made within three years of the fee waiver or expense reimbursement and does not cause the Total Annual Fund Operating Expenses of the Fund (i.e., after recoupment has been taken into account) to exceed the lesser of (i) the then-current expense cap and (ii) the expense cap in place at the time the fees/ expenses were waived/reimbursed. Total Annual Fund Operating Expenses will increase if exclusions from the Expense Cap apply.

The advisory fee, if not waived, is accrued daily and paid monthly by the Fund and is assessed based on the daily net assets of the Fund. In addition to receiving its advisory fee from the Fund, the Adviser may also act and be compensated as an investment manager for its clients with respect to assets that such clients have invested in the Fund. If you have a separately managed account with the Adviser with assets invested in the Fund, the Adviser will not assess or receive any management fee on the portion of the separately managed account invested in the Fund.

Table 1 in Appendix B shows the dollar amount of advisory fees accrued by the Fund, the amount of advisory fees waived and/or expenses reimbursed by the Adviser, if any, and the actual advisory fees retained by the Adviser. The data provided is for the last three fiscal years.

**Advisory Agreement.** The Fund's Advisory Agreement remains in effect for an initial period of two years from the date of its effectiveness, and thereafter the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party (other than as Trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to the Fund on 60 days' written notice when authorized either by vote of the Fund's shareholders or by a majority vote of the Board, or by the Adviser on 60 days' written notice to the Trust. The Advisory Agreement terminates immediately upon assignment.

Under the Advisory Agreement, the Adviser is not liable for any error of judgment, mistake of law, or in any event whatsoever except for willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the agreement.

## G. Distributor

**Distribution Services.** Foreside Fund Services, LLC (the “Distributor”), a wholly owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group), located at 190 Middle Street, Suite 401, Portland, Maine 04101, acts as the agent of the Trust in connection with the continuous offering of Fund shares pursuant to a Distribution Agreement with the Trust. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Adviser or any other service provider for the Trust.

The Distributor continually distributes shares of the Fund on a commercially reasonable efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enters into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to investors by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not the investors, will be the shareholder of record, although investors may have the right to vote shares depending upon their arrangement with the intermediary. The Fund does not have a distribution (12b-1) plan; accordingly, the Distributor does not receive compensation from the Fund for its distribution (12b-1) services. The Adviser pays the Distributor a fee from the Adviser’s own resources for certain distribution-related services.

## H. Other Fund Service Providers

**Administrator, Fund Accountant, Transfer Agent, and Compliance Services.** Apex Fund Services and its subsidiaries provide administration, compliance, fund accounting and transfer agency services to the Fund. Apex Fund Services is a wholly owned subsidiary of Apex US Holdings LLC.

Pursuant to a Services Agreement (the “Services Agreement”) with Atlantic Fund Administration, LLC (d/b/a Apex Fund Services), the Fund pays Apex Fund Services a bundled fee for administration, compliance, fund accounting and transfer agency services. The Fund also pays Apex Fund Services certain surcharges and shareholder account fees. The fee is accrued daily by the Fund and is paid monthly based on the average net assets, transactions and positions for the prior month.

The Services Agreement continues in effect until terminated, so long as its continuance is specifically approved or ratified with such frequency and in such manner required by applicable law. After an initial three-year term, the Services Agreement is terminable with or without cause and without penalty by the Trust or Apex Fund Services on 120 days’ written notice to the other party. The Services Agreement is also terminable for cause by the non-breaching party on at least 60 days’ written notice to the other party, provided that the other party has not cured the breach within that notice period. Under the Services Agreement, Apex Fund Services is not liable to the Fund or the Fund’s shareholders for any act or omission, except for willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Services Agreement. The Services Agreement also provides that Apex Fund Services will not be liable to a shareholder for any loss incurred due to a NAV difference if that difference is less than or equal to 0.5% or less than or equal to \$25.00 per shareholder account, and in addition, limits the amount of any loss for which Apex Fund Services would be liable. Also, Apex Fund Services is not liable for the errors and omissions of others, including the entities that supply security prices to Apex Fund Services and the Fund. Losses incurred by the Fund as a result of acts or omissions by Apex Fund Services or any other service provider for which Apex Fund Services or the service provider is not liable to the Fund would be borne through the Fund by its shareholders.

As Administrator, Apex Fund Services administers the Fund’s operations except those that are the responsibility of any other service provider hired by the Trust, all in the manner and to the extent as may be authorized by the Board. The Administrator’s responsibilities include, but are not limited to: (1) overseeing the performance of administrative and

professional services rendered to the Fund by others, including its custodian, transfer agent and dividend disbursing agent as well as legal, auditing, shareholder servicing and other services performed for the Fund; (2) preparing for filing and filing certain regulatory filings (*i.e.*, registration statements and shareholder reports) subject to Trust counsel and/or independent auditor oversight; (3) overseeing the preparation and filing of the Fund's tax returns, and the preparation of financial statements and related reports to the Fund's shareholders, the SEC and state and other securities administrators; (4) providing the Fund with adequate general office space and facilities and providing persons suitable to the Board to serve as officers of the Trust; (5) assisting the Adviser in monitoring Fund holdings for compliance with prospectus investment restrictions and assisting in preparation of periodic compliance reports; and (6) with the cooperation of the Adviser, the officers of the Trust and other relevant parties, preparing and disseminating materials for meetings of the Board.

Apex Fund Services provides a Principal Executive Officer, a Principal Financial Officer, the CCO, and an Anti-Money Laundering Compliance Officer to the Fund, as well as certain additional compliance support functions.

Atlantic Shareholder Services, LLC, 190 Middle Street, Suite 101, Portland, Maine 04101 (the "Transfer Agent"), a wholly owned subsidiary of Apex US Holdings LLC (d/b/a Apex Fund Services), serves as transfer agent and distribution paying agent for the Fund. The Transfer Agent is registered as a transfer agent with the SEC. The Transfer Agent maintains an account for each shareholder of record of the Fund and is responsible for processing purchase and redemption requests and paying distributions to shareholders of record.

As Fund accountant, Apex Fund Services provides fund accounting services to the Fund. These services include calculating the NAV of the Fund.

Table 2 in Appendix B shows the dollar amount of the fees accrued by the Fund for administration services, the amount of fees waived by Apex Fund Services, if any, and the actual fees retained by Apex Fund Services under the Services Agreement. The data provided is for the last three fiscal years.

**Custodian.** Northern Trust Company (the "Custodian") is the custodian for the Fund. The Custodian safeguards and controls the Fund's cash and securities, determines income and collects interest on Fund investments. The Custodian may employ subcustodians to provide custody of the Fund's domestic and foreign assets. The Custodian also maintains certain books and records of the Fund that are required by applicable federal regulations. The Custodian is located at 50 South LaSalle Street, Chicago, Illinois 60603.

**Legal Counsel.** K&L Gates LLP, 1601 K Street, N.W., Washington, D.C. 20006, serves as legal counsel to the Trust.

**Independent Registered Public Accounting Firm.** Cohen & Company, Ltd. ("Cohen & Co"), 1835 Market Street, Suite 310, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund. Cohen & Co audits the annual financial statements of the Fund, provides the Fund with an audit opinion and reviews certain regulatory filings of the Fund. Cohen & Co Advisory, LLC, an affiliate of Cohen & Company, Ltd., provides tax services as requested.

### A. How Securities are Purchased and Sold

Purchases and sales of portfolio securities that are fixed-income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from which the Fund purchases or to which the Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There usually are no brokerage commissions paid for these securities.

Purchases and sales of portfolio securities that are equity securities (for instance, common stock and preferred stock) are generally effected if (1) the security is traded on an exchange, through brokers that charge commissions and (2) the security is traded in the over-the-counter markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated.

When transactions are executed in an over-the-counter market, the Adviser will seek to deal with the primary market makers, but when necessary in order to obtain best execution, the Adviser will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflect the spread between the bid and asked price.

In the case of fixed-income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission, markup or markdown.

### B. Commissions Paid

Table 3 in Appendix B shows the dollar amount of the aggregate brokerage commissions paid by the Fund; the amount of commissions paid to an affiliate of the Fund, the Adviser or the Distributor; the percentage of brokerage commissions paid to an affiliate of the Fund, the Adviser or the Distributor; and the percentage of transactions executed by an affiliate of the Fund, the Adviser or the Distributor. The data provided is for the last three fiscal years.

### C. Adviser Responsibility for Purchases and Sales and Choosing Broker-Dealers

The Adviser places orders for the purchase and sale of securities with broker-dealers selected by and at the discretion of the Adviser. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of the Fund rather than by any formula.

The Adviser seeks “best execution” for all portfolio transactions. This means that the Adviser seeks the most favorable price and execution available. The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Adviser takes into account factors such as the size of the order, the difficulty of execution, the efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker-dealer. The Fund may pay a higher commission if, for example, the broker-dealer has specific expertise in a particular type of transaction (due to factors such as size or difficulty) or is highly efficient in trade execution.

The Adviser may also give consideration to brokerage and research services furnished to the Adviser by broker-dealers and may cause the Fund to pay these broker-dealers a higher commission or spread than may be charged by other broker-dealers. Research services may include reports that are common in the industry, such as research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the Adviser uses the research to manage all client accounts. Therefore, the commission dollars spent for research generally benefit all of the Adviser’s clients and the Fund’s investors, although a particular client may not benefit from research received on each occasion. The Adviser does not reduce its fees because the Adviser receives research.

Table 4 in Appendix B lists the Fund’s directed brokerage in return for research services, the amount of transactions so directed, and the amount of commissions earned by the broker-dealer during the past fiscal year.

#### **D. Counterparty Risk**

The Adviser monitors the creditworthiness of counterparties to the Fund's transactions and intends to enter into a transaction only when it believes that the counterparty presents appropriate credit risks.

#### **E. Transactions through Affiliates**

The Adviser may effect brokerage transactions through affiliates of the Adviser (or affiliates of those persons) pursuant to procedures adopted by the Trust and in accordance with applicable law.

#### **F. Other Accounts of the Adviser**

Investment decisions for the Fund are made independently from those for any other account or investment company that is or may in the future become advised by the Adviser or its affiliates. Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. In some instances, with any required consent, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security, in which event each day's transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Adviser's opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Adviser occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales.

#### **G. Portfolio Turnover**

The frequency of portfolio transactions of the Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, the Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. Higher portfolio turnover rates may result in increased brokerage costs to the Fund and a possible increase in short-term capital gains (taxable to shareholders as ordinary income when distributed to them) or losses. An annual portfolio turnover rate of 100% would occur if all the securities in the Fund were replaced once in a period of one year.

Portfolio turnover rate is defined under the rules of the SEC as the value of the securities purchased or securities sold, excluding all securities whose maturities at time of acquisition were one year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one year, are excluded from the calculation of portfolio turnover rate.

#### **H. Securities of Regular Broker-Dealers**

From time to time the Fund may acquire and hold securities issued by its "regular brokers and dealers" or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the ten brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund's last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund's last fiscal year; or (3) sold the largest amount of the Fund's shares during the Fund's last fiscal year.

Table 5 in Appendix B lists the regular brokers and dealers of the Fund whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund's holdings of those securities as of the Fund's most recent fiscal year ended December 31, 2024.

#### **I. Portfolio Holdings**

Portfolio holdings as of the end of the Fund's annual and semi-annual fiscal periods are reported to the SEC on Form N-CSR within 10 days of the mailing of the annual or semi-annual report (typically no later than 70 days after the end of each period). Monthly portfolio disclosures will be filed with the SEC on Form N-PORT no later than 60 days after the end of each fiscal quarter. The monthly holdings reports on Form N-PORT for the first and second months of the fiscal quarter will remain nonpublic and the monthly holdings report for the third month of the fiscal quarter will become publicly available upon filing (with the exception of certain items). You may request a copy of the Fund's latest annual or semi-annual report to

shareholders or a copy of the Fund's latest Form N-PORT, when it is available, which contains the Fund's portfolio holdings, by contacting the Transfer Agent at the address or phone number listed on the cover of this SAI. You may also obtain a copy of the Fund's latest Form N-CSR and Form N-PORT by accessing the SEC's website at [www.sec.gov](http://www.sec.gov).

In addition, the Adviser may make publicly available, on a quarterly basis, information regarding the Fund's top ten holdings (including name and percentage of the Fund's assets invested in each such holding) and the percentage breakdown of the Fund's investments by country and industry, as applicable. This holdings information may also be made available through the Fund's website and may be released within 15 days of the quarter end.

The Fund's nonpublic portfolio holdings information is received by certain service providers in advance of public release in the course of performing or enabling them to perform the contractual or fiduciary duties necessary for the Fund's operations that the Fund has retained them to perform so long as the disclosure is subject to duties of confidentiality imposed by law and/or contract as determined by the Fund's officers and, if applicable, the Board. The Fund's portfolio holdings are available in real-time on a daily basis to the Adviser, the Administrator and the Custodian. In addition, the Distributor, the independent auditors, proxy voting services, mailing services, financial printers and ratings or ranking organizations may have access, but not on a daily real-time basis, to the Fund's nonpublic portfolio holdings information on an ongoing basis. The Trustees, Trust's officers, legal counsel to the Trust and to the Independent Trustees and the Fund's independent registered public accounting firm may receive similar information on an as needed basis.

From time to time, nonpublic information regarding the Fund's portfolio holdings may also be disclosed to certain mutual fund consultants, analysts or other entities or persons ("Recipients") that have a legitimate business purpose in receiving such information. Any disclosure of information more current than the latest publicly available portfolio holdings information will be made only if a Trust officer determines that: (1) the more current information is necessary for a Recipient to complete a specified task; (2) the Fund has legitimate business purposes for disclosing the information; and (3) the disclosure is in the best interests of the Fund and its shareholders. Any Recipient receiving such information will be required to agree in writing to: (a) keep the information confidential; (b) use it only for agreed-upon purposes; and (c) not trade or advise others to trade securities, including shares of the Fund, on the basis of the information. Confidentiality agreements entered into for the receipt of nonpublic information typically will also provide, among other things, that the Recipient: (i) will limit access to the information to its employees and agents who are obligated to keep and treat such information as confidential; (ii) will assume responsibility for any breach of the terms of the confidentiality agreement by its employees; and (iii) upon request from the Trust, will return or promptly destroy the information. Any Recipient that is a ratings or ranking organization receiving such information must have in place control mechanisms to reasonably ensure or otherwise agree that: (x) the holdings information will be kept confidential; (y) no employee will use the information to effect trading or for their personal benefit; and (z) the nature and type of information that any employee, in turn, may disclose to third-parties is limited. The Trust officer will report to the Board at its next regularly scheduled Board meeting the entering into of an agreement with a Recipient for the disclosure of nonpublic portfolio holdings information and will include in the report the Trust officer's reasons for determining to permit such disclosure.

The Adviser may provide investment management for accounts of clients other than the Fund, which may result in some of those accounts having a composition substantially similar to that of the Fund. The Adviser and its affiliates may provide regular information to clients and others regarding the holdings in accounts that each manages, but no information is provided to clients or others that identifies the actual composition of the Fund's holdings, specifies the amount of the Fund's assets invested in a security or specifies the extent of any such similarities among accounts managed by the Adviser.

No compensation is received by the Fund, or, to the Fund's knowledge, paid to the Adviser or any other party in connection with the disclosure of the Fund's portfolio holdings. The codes of ethics of the Trust and the Adviser are intended to address, among other things, potential conflicts of interest arising from the misuse of information concerning the Fund's portfolio holdings. In addition, the Fund's service providers may be subject to confidentiality provisions contained within their service agreements, codes of ethics, professional codes and other similar policies that address conflicts of interest arising from the misuse of this information.

The Adviser, the Administrator and the Distributor must inform a Trust officer if they identify any conflict between the interests of shareholders and those of another party resulting from the disclosure of nonpublic portfolio holdings information. These conflicts will be reported to the Board for appropriate action at its next regularly scheduled meeting.

There is no assurance that the Fund's portfolio holdings disclosure policy will protect the Fund against potential misuse of holdings information by individuals or firms in possession of that information.

## PURCHASE AND REDEMPTION INFORMATION

---

### A. General Information

You may effect purchases or redemptions or request any shareholder privilege by contacting the Transfer Agent.

The Fund accepts orders for the purchase or redemption of shares of the Fund on any weekday except days when the New York Stock Exchange (the “NYSE”) is closed. Under unusual circumstances, the Fund may accept orders when the NYSE is closed if deemed appropriate by the Trust’s officers.

The shares of the Fund may not be available for sale in the state in which you reside. Please check with your investment professional to determine the Fund’s availability.

### B. Additional Purchase Information

Shares of the Fund are offered on a continuous basis by the Distributor.

The Fund reserves the right to refuse any purchase request.

Fund shares are normally issued for cash only. In its discretion, the Fund may accept portfolio securities that meet the investment objective and policies of the Fund as payment for Fund shares. The Fund may allow an in kind purchase provided that, among other things: (i) the purchase will not dilute the interests of its shareholders; (ii) the assets accepted by the Fund consist of securities that are appropriate, in type and amount, for investment by the Fund in light of its investment objective and policies and current holdings; (iii) market quotations are readily available for the securities; (iv) in determining the value of the assets contributed and the corresponding amount of shares issued, the Trust’s Valuation Policy will be applied; (v) the transaction must comply with the Trust’s Affiliated Persons and Transactions Policy if the person investing is an affiliated person; and (vi) the Adviser to the Fund discloses to the Board the existence of, and all material facts relating to, any conflicts of interest between the Adviser and the Fund in the proposed in-kind purchase.

**IRAs.** All contributions into an individual retirement account (an “IRA”) through the automatic investing service are treated as IRA contributions made during the year that the contribution is received.

**UGMAs/UTMAs.** If the custodian’s name is not in the account registration of a gift or transfer to minor (“UGMA/UTMA”) account, the custodian must provide instructions in a manner indicating custodial capacity.

### C. Additional Redemption Information

You may redeem Fund shares at NAV.

The Fund may reverse a transaction for the purchase of Fund shares within two business days of notification from your bank that your funds did not clear (1) to collect any charge relating to transactions effected for the benefit of a shareholder that is applicable to the Fund’s shares as provided in the Prospectus or (2) to recoup any actual losses incurred by the Fund or the Transfer Agent in connection with any reversed transaction.

**Suspension of Right of Redemption.** The right of redemption may not be suspended for more than seven days after the tender of Fund shares, except for any period during which: (1) the NYSE is closed (other than customary weekend and holiday closings) or during which the SEC determines that trading thereon is restricted; (2) an emergency (as determined by the SEC) exists as a result of which disposal by the Fund of its securities is not reasonably practicable or as a result of which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (3) the SEC has entered a suspension order for the protection of the shareholders of the Fund.

**Redemption in Kind.** Redemption proceeds normally are paid in cash. The Trust has filed an election with the SEC, however, pursuant to which the Fund may effect a redemption in portfolio securities at the shareholder’s request or if the shareholder is redeeming more than \$250,000 or 1% of the Fund’s total net assets, whichever is less, during any 90-day period. To the extent the Fund satisfies a redemption request by distributing portfolio securities, it will do so pursuant to procedures adopted by the Board. If the Fund pays redemption proceeds in kind, the redeeming shareholder may incur transaction costs to dispose of the securities and may receive less for them than the price at which they were valued for purposes of redemption. In addition, if the Fund redeems shares in this manner, the shareholder assumes the risk of a subsequent change in the market value of those securities, the costs of liquidating the securities (such as brokerage costs)

and the possibility of a lack of a liquid market for those securities. In-kind redemptions may take the form of a pro rata portion of the Fund's portfolio, individual securities, or a representative basket of securities.

**NAV Determination.** The offering price for Fund shares is at their current NAV. In determining the NAV of the Fund, securities for which market quotations are readily available are valued at current market value using the last reported sales price or the official closing price from the primary exchange where the security is listed, as provided by an independent pricing service or, if no sales price is reported, the mean of the last bid and ask prices. If market quotations are not readily available or the Fund reasonably believes that they are unreliable, then securities are valued at fair value, as determined by the Adviser, in its capacity as the valuation designee. For further information, see the "General Information" section in the Prospectus.

**Distributions.** Distributions of net investment income will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) as of the last day of the period with respect to which the distribution is paid. Distributions of net realized capital gains will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested.

The tax information set forth in the Prospectus and in this section relates solely to federal tax law and assumes that the Fund qualifies for treatment as a RIC (as discussed below). This information is only a summary of certain key federal income tax considerations affecting the Fund and its shareholders and is in addition to the tax information provided in the Prospectus. No attempt has been made to present a complete explanation of the federal tax treatment of the Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

This “Taxation” section is based on the IRC, the regulations thereunder, IRS interpretations and similar authority on which the Fund may rely, all as in effect on the date hereof, as well as on court decisions publicly available through that date. Future legislative, regulatory, or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

***Each investor should consult his or her own tax advisor as to the federal, state, local, and foreign tax provisions applicable to the investor.***

### **A. Qualification for Treatment as a Regulated Investment Company**

The Fund intends, for each taxable year, to continue to qualify for treatment as a RIC. This qualification does not involve governmental supervision of management or investment practices or policies of the Fund.

The taxable year-end of the Fund is December 31, which is the same as its fiscal year-end.

**Consequences of Qualification.** As a RIC, the Fund will not be subject to federal income tax on the portion of its investment company taxable income (generally, interest, dividends, other ordinary income, the excess of net short-term capital gain over net long-term capital loss, and net gains and losses from certain foreign currency transactions, net of expenses, all determined without regard to any deduction for dividends paid) and net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss) that it distributes to its shareholders. To qualify to be taxed as a RIC for a taxable year, the Fund must satisfy the following requirements, among others:

The Fund must distribute at least the sum of 90% of its investment company taxable income plus 90% of its net interest income excludable from gross income under IRC Section 103(a) for the taxable year (“Distribution Requirement”). Certain distributions made by the Fund after the close of its taxable year are considered distributions attributable to that taxable year for purposes of satisfying this requirement.

The Fund must derive at least 90% of its gross income for the taxable year from (1) dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of securities or foreign currencies, or other income (including gains from options) derived from its business of investing in securities or those currencies and (2) net income from an interest in a “qualified publicly traded partnership” (“QPTP”) (income described in (1) and (2), collectively “Qualifying Income”) (“Gross Income Requirement”). A QPTP is defined as a “publicly traded partnership” (generally, a partnership the interests in which are “traded on an established securities market” or are “readily tradable on a secondary market (or the substantial equivalent thereof)”) that meets certain qualifying income but derives less than 90% of its gross income from sources described in clause (1).

The Fund must satisfy the following asset diversification requirements (“Diversification Requirements”) at the close of each quarter of its taxable year: (1) at least 50% of the value of its total assets must consist of cash and cash items, Government securities, securities of other RICs, and securities of other issuers, with these other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the Fund’s total assets and that does not represent more than 10% of the issuer’s outstanding voting securities (equity securities of a QPTP being considered voting securities for these purposes); and (2) no more than 25% of the value of its total assets may be invested in (a) the securities of any one issuer (other than Government securities and securities of other RICs), (b) the securities (other than securities of other RICs) of two or more issuers that the Fund controls (by owning 20% or more of their voting power) and that are engaged in the same, similar, or related trades or businesses, or (c) the securities of one or more QPTPs.

**Failure to Qualify.** If for any taxable year the Fund does not qualify for treatment as a RIC, either (1) by failing to satisfy the Distribution Requirement, even if it satisfied the Gross Income Requirement and the Diversification Requirements, or (2) by failing to satisfy the Gross Income Requirement and/or either Diversification Requirement and being unable, or determining not, to cure the failure in the manner described in the next two paragraphs, then for federal income tax purposes all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for

dividends paid to its shareholders. In addition, for those purposes the dividends would be taxable to the shareholders as ordinary income to the extent of the Fund's current and accumulated earnings and profits, except that, for (a) individual and certain other non-corporate shareholders (each, an "individual shareholder"), the part thereof that is "qualified dividend income" would be subject to federal income tax at the rates for net capital gain, which are a maximum of 15% for a non-corporate shareholder with taxable income not exceeding certain thresholds (which will be adjusted for inflation annually) and 20% for non-corporate shareholders with taxable income exceeding such thresholds, and (b) those dividends would be eligible for the dividends-received deduction available to corporations under certain circumstances. Furthermore, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying for RIC treatment.

If the Fund fails to satisfy the Gross Income Requirement for any taxable year, it nevertheless will be considered to have satisfied that requirement for that year if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund pays a tax in an amount equal to the excess of its gross income that is not Qualifying Income over one-ninth of its gross income that is Qualifying Income.

If the Fund satisfies both Diversification Requirements at the close of its first quarter of its first taxable year, but fails to satisfy either Diversification Requirement at the close of any subsequent taxable year quarter by reason of a discrepancy existing immediately after its acquisition of any security that is wholly or partly the result of that acquisition during that quarter, it will not lose its status for that quarter as a RIC if the discrepancy is eliminated within 30 days after the quarter's close. If the Fund fails to satisfy either or both Diversification Requirement(s) (other than a *de minimis* failure, as described in the IRC) for a quarter and the preceding sentence does not apply, it nevertheless will be considered to have satisfied those requirements for that quarter if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund disposes of the assets that caused the failure within six months after the last day of the quarter in which it identifies the failure in the manner prescribed by the IRS. In that case, the Fund will also be liable for a federal tax equal to the greater of \$50,000 or the amount determined by multiplying the net income generated by those assets for the period from the date the failure occurs to the date of disposition thereof by the highest rate of federal income tax applicable to corporations (currently 21%).

Failure to qualify for treatment as a RIC would thus have a negative impact on the Fund's after-tax performance. It is possible that the Fund will not qualify as a RIC in any given taxable year.

## **B. Fund Distributions**

The Fund anticipates distributing substantially all of its investment company taxable income for each taxable year. These distributions will be taxable to a shareholder as ordinary income, but, as described in the Prospectus, a portion of the distributions may be treated as "qualified dividend income".

The Fund anticipates distributing substantially all of its net capital gain (after reduction for any capital loss carryovers, *i.e.*, unutilized realized net capital losses from prior taxable years) for each taxable year. These distributions generally will be made only once a year, usually in December, but the Fund may make a limited number of additional distributions of net capital gain at any time during the year. These distributions will be taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held his or her shares. These distributions will not qualify for the dividends-received deduction or as "qualified dividend income."

A distribution by the Fund that does not constitute an ordinary income dividend or capital or foreign currency gain distribution will be treated as a non-taxable "return of capital." A return of capital distribution will reduce a shareholder's tax basis in Fund shares and will be treated as gain from the sale of the shares to the extent it exceeds the shareholder's basis.

Non-U.S. investors not engaged in a U.S. trade or business with which their investment in the Fund is "effectively connected" will be subject to U.S. federal income tax treatment that is different from that described above. Such non-U.S. investors may be subject to withholding tax at the rate of 30% (or a lower rate under an applicable tax treaty) on amounts treated as ordinary dividends from the Fund. Capital gain distributions, if any, are not subject to the 30% withholding tax. Exemption from this withholding tax is also provided for dividends properly reported in writing by the Fund to its shareholders as "interest-related dividends" or as "short-term capital gain dividends" paid by the Fund with respect to its "qualified net interest income" or "qualified short-term gain," respectively (all such terms as defined in the IRC). Non-U.S. investors will need to provide an effective IRS Form W-8BEN or other authorized withholding certificate to qualify for the exemption.

Each distribution by the Fund will be treated in the manner described above regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another fund). If a shareholder reinvests a distribution in additional

shares, the shareholder will be treated as having received a distribution in an amount equal to the fair market value of the reinvested shares, determined as of the reinvestment date.

When a shareholder purchases shares of the Fund, the purchase price (NAV) will include any undistributed net investment income and realized net capital gains and foreign currency gains and any unrealized appreciation in the value of the assets of the Fund. A distribution of that income or gain (including net gain, if any, from realizing all or part of that appreciation) will be taxable to a shareholder in the manner described above, even if the distribution economically constitutes a partial return of invested capital to the shareholder.

Ordinarily, a shareholder is required to take taxable distributions by the Fund into income in the year in which they are made. A distribution declared in October, November, or December of any year and payable to shareholders of record on a specified date in one of those months, however, is deemed to be paid by the Fund and received by those shareholders on December 31 of that year if the distribution is paid in January of the following year.

The Fund will send information annually to its shareholders regarding the federal income tax status of distributions made (or deemed made) during the year.

### **C. Foreign Account Tax Compliance Act (“FATCA”)**

Under FATCA, foreign financial institutions (“FFIs”) and non-financial foreign entities (“NFFEs”) that are Fund shareholders may be subject to a generally nonrefundable 30% withholding tax on income dividends the Fund pays. As discussed more fully below, the FATCA withholding tax generally may be avoided (a) by an FFI, if it reports certain information regarding direct and indirect ownership of financial accounts U.S. persons hold with the FFI, and (b) by an NFFE that certifies its status as such and, in certain circumstances, reports information regarding substantial U.S. owners.

An FFI may avoid FATCA withholding by becoming a “participating FFI,” which requires the FFI to enter into a tax compliance agreement with the IRS under the IRC. Under such an agreement, a participating FFI agrees to (1) verify and document whether it has U.S. accountholders, (2) report certain information regarding their accounts to the IRS, and (3) meet certain other specified requirements.

The U.S. Treasury Department has negotiated intergovernmental agreements (each, an “IGA”) with certain countries and is in various stages of negotiations with other foreign countries with respect to one or more alternative approaches to implement FATCA; entities in those countries may be required to comply with the terms of the relevant IGA instead of U.S. Treasury regulations. An FFI resident in a country that has entered into a Model I IGA with the United States must report to that country’s government (pursuant to the terms of the applicable IGA and applicable law), which will, in turn, report to the IRS. An FFI resident in a Model II IGA country generally must comply with U.S. regulatory requirements, with certain exceptions, including the treatment of recalcitrant accountholders. An FFI resident in one of those countries that complies with whichever of the foregoing applies will be exempt from FATCA withholding.

An NFFE that is the beneficial owner of a payment from the Fund may avoid FATCA withholding generally by certifying its status as such and, in certain circumstances, either that (1) it does not have any substantial U.S. owners or (2) it does have one or more such owners and reports the name, address, and taxpayer identification number of each such owner. The NFFE will report to the Fund or other applicable withholding agent, which may, in turn, report information to the IRS.

Those foreign shareholders also may fall into certain exempt, excepted, or deemed compliant categories established by U.S. Treasury regulations, IGAs, and other guidance regarding FATCA. An FFI or NFFE that invests in the Fund will need to provide the Fund with documentation properly certifying the entity’s status under FATCA to avoid FATCA withholding. The requirements imposed by FATCA are different from, and in addition to, the tax certification rules to avoid backup withholding described in the Prospectus. Foreign investors are urged to consult their tax advisors regarding the application of these requirements to their own situations and the impact thereof on their investment in the Fund.

### **D. Redemption of Shares**

In general, you will realize gain or loss on redemption of Fund shares in an amount equal to the difference between the proceeds of the redemption and your adjusted tax basis in the shares. All or a portion of any loss so realized will be disallowed if you purchase Fund shares (for example, by reinvesting distributions) within 30 days before or after the redemption (*i.e.*, a “wash” sale); if disallowed, the loss would be reflected in an upward adjustment to the basis in the purchased shares. In general, any gain or allowed loss arising from a redemption of shares of the Fund will be considered a capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from a

redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain, if any, received on such shares. In determining the holding period of shares for this purpose, any period during which your risk of loss is offset by means of an option, short sale, or similar transaction is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

#### **E. Federal Excise Tax**

A 4% non-deductible federal excise tax ("Excise Tax") is imposed on a RIC that fails to distribute in each calendar year an amount equal to at least the sum of (1) 98.0% of its ordinary income for the year plus (2) 98.2% of its capital gain net income for the one-year period ended on October 31 of the year plus (3) any ordinary income and capital gain net income for previous years that were not distributed during those years. The Fund will be treated as having distributed any amount on which it is subject to income tax for any taxable year ending in the calendar year.

For purposes of calculating the Excise Tax, the Fund (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year and (2) excludes foreign currency gains and losses realized or sustained after October 31 of any year in determining the amount of ordinary income for that calendar year and includes them in determining the amount of ordinary income for the succeeding calendar year.

The Fund intends to make sufficient distributions each year of its ordinary income and capital gain net income to avoid liability for the Excise Tax. The Fund may in certain circumstances be required to liquidate portfolio investments to make distributions sufficient to avoid that liability.

#### **F. Certain Tax Rules Applicable to Fund Transactions**

**Investments in Derivatives.** When a put or call option purchased by the Fund expires unexercised, the premium it paid gives rise to short-term or long-term capital loss at the time of expiration (depending on the length of the exercise period for the option). When a put or call option written by the Fund expires unexercised, the premium it received gives rise to short-term capital gain at the time of expiration. When the Fund exercises a call option, the basis in the underlying security is increased by the amount of the premium it paid for the option. When the Fund exercises a put option, the gain (or loss) from the sale of the underlying security is decreased (or increased) by the premium it paid for the option. When a put or call option written by the Fund is exercised, the purchase price (or the selling price in the case of a call) of the underlying security is decreased (or increased in the case of a call) for federal income tax purposes by the amount of the premium received.

Some futures contracts, foreign currency contracts, and "nonequity" options (*i.e.*, certain listed options, such as those on a "broad-based" securities index) in which the Fund invests - except any "securities futures contract" that is not a "dealer securities futures contract" (both as defined in the IRC) and any interest rate swap, currency swap, basis swap, interest rate cap, interest rate floor, commodity swap, equity swap, equity index swap, credit default swap, or similar agreement - may be subject to IRC section 1256 ("Section 1256 contracts"). Any Section 1256 contracts the Fund holds at the end of its taxable year (and generally for purposes of the Excise Tax, on October 31 of each year) must be "marked to market" (that is, treated as having been sold at that time for their fair market value) for federal tax purposes, with the result that unrealized gains or losses will be treated as though they were realized. Sixty percent of any net gain or loss realized on these deemed sales, and 60% of any net realized gain or loss from any actual sales of Section 1256 contracts, will be treated as long-term capital gain or loss, and the balance will be treated as short-term capital gain or loss; however, certain foreign currency gains or losses arising from Section 1256 contracts will be treated as ordinary income or loss. These rules may operate to increase the amount that the Fund must distribute to satisfy the Distribution Requirement (*i.e.*, with respect to the portion treated as short-term capital gain, which will be includible in its investment company taxable income and thus taxable to its shareholders as ordinary income when distributed to them), and to increase the net capital gain the Fund recognizes, even though the Fund may not have closed the transactions and received cash to pay the distributions. The Fund may elect not to have the foregoing rules apply to any "mixed straddle" (that is, a straddle, which the Fund clearly identifies in accordance with applicable regulations, at least one (but not all) of the positions of which are Section 1256 contracts), although doing so may have the effect of increasing the relative proportion of short-term capital gain (distributions of which are taxable to its shareholders as ordinary income) and thus increasing the amount of dividends it must distribute.

Any option or other position entered into or held by the Fund in conjunction with any other position it holds may constitute a "straddle" for federal income tax purposes. In general, straddles are subject to certain rules that may affect the amount, character, and timing of recognition of the Fund's gains and losses with respect to the straddle positions by requiring, among other things, that (1) any loss realized on disposition of one position of a straddle not be recognized to the extent that

the Fund has unrealized gains with respect to the other positions in the straddle, (2) the Fund's holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term rather than long-term capital gain), (3) the losses recognized with respect to certain straddle positions that are part of a mixed straddle and are non-Section 1256 contracts be treated as 60% long-term and 40% short-term capital loss, and (4) losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses be treated as long-term capital losses. In addition, the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to the Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles. In general, the foregoing rules do not apply to any straddles held by the Fund if all of the offsetting positions consist of Section 1256 contracts.

**Investments in Foreign Currencies and Securities.** Gains or losses attributable to fluctuations in exchange rates that occur between the time that the Fund accrues interest, dividends or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time that the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary losses. Similarly, gains or losses from the disposition of a foreign currency, or from the disposition of a fixed-income security denominated in a foreign currency that are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the security and the date of its disposition, also are treated as ordinary income or ordinary losses. These gains or losses increase or decrease the amount of the Fund's investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of its net capital gain.

If the Fund owns shares in a foreign corporation that constitutes a "passive foreign investment company" for federal tax purposes (a "PFIC") and the Fund does not make either of the elections described in the next two paragraphs, it will be subject to federal income tax on a portion of any "excess distribution" it receives from the PFIC and any gain it derives from the disposition of such shares (collectively, "PFIC Income"), even if it distributes the PFIC Income as a taxable dividend to its shareholders. The Fund will also be subject to additional interest charges in respect of deferred taxes arising from the PFIC Income. Any such tax paid by the Fund as a result of its ownership of shares in a PFIC will not give rise to any deduction or credit to the Fund or to any shareholder. A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests for a taxable year: (1) at least 75% of its gross income is derived from "passive income" (including interest and dividends); or (2) an average of at least 50% of the value (or adjusted tax basis, if elected) of its assets produce, or are held for the production of, "passive income." The Fund's distributions of PFIC Income will not be eligible for the 15% and 20% maximum federal income tax rates on individual shareholders' "qualified dividend income" described in the Prospectus.

The Fund may elect to "mark to market" its stock in a PFIC. Under such an election, the Fund would include in gross income (and treat as ordinary income) each taxable year an amount equal to the excess, if any, of the fair market value of the PFIC stock as of the close of the taxable year over the Fund's adjusted basis in the PFIC stock. The Fund would be allowed a deduction for the excess, if any, of that adjusted basis over that fair market value, but only to the extent of any net mark-to-market gains included in gross income by the Fund for prior taxable years. The Fund's adjusted basis in the PFIC stock would be adjusted to reflect the amounts included in, or deducted from, gross income under this election. Amounts so included, as well as gain realized on the disposition of the PFIC stock, would be treated as ordinary income. The deductible portion of any mark-to-market loss, as well as any loss realized on the disposition of the PFIC stock to the extent that such loss does not exceed the net mark-to-market gains previously included in gross income by the Fund, would be treated as ordinary loss. The Fund generally would not be subject to the deferred tax and interest charge provisions discussed above with respect to PFIC stock for which a mark-to-market election has been made.

If the Fund purchases shares in a PFIC and elects to treat the PFIC as a "qualified electing fund," the Fund would be required to include in its gross income each taxable year its pro rata share of the ordinary income and net capital gains of the PFIC, even if the income and gains were not distributed to the Fund. Any such income would be subject to the Distribution Requirement and the calendar year Excise Tax distribution requirement described above. In most instances it will be very difficult, if not impossible, to make this election because some of the information required to make this election may not be easily obtainable.

Investors should be aware that determining whether a foreign corporation is a PFIC is a fact-intensive determination that is based on various facts and circumstances and thus is subject to change, and the principles and methodology used therein are subject to interpretation. As a result, (1) the Fund may not be able, at the time it acquires a foreign corporation's shares, to ascertain whether the corporation is a PFIC, and (2) a foreign corporation may become a PFIC after the Fund acquires shares therein. While the Fund generally will seek not to invest in PFIC shares to avoid the tax consequences detailed above,

there are no guarantees that it will be able to do so, and it reserves the right to make such investments as a matter of its investment policy.

**Investments in MLPs.** The Fund's investment in MLPs that are QPTPs is subject to the 25% Limitation. An MLP that is a "publicly traded partnership" will not be treated as a corporation, and instead will be treated as a partnership, for federal tax purposes, generally if it derives at least 90% of its annual gross income from (a) Qualifying Income (excluding net income from an interest in a QPTP), (b) real property rents, (c) gain from the sale or other disposition of real property, (d) the exploration, development, mining or production, processing, refining, transportation, or marketing of any mineral or natural resource or industrial source carbon dioxide, or the transportation or storage of certain fuels, and (e) in the case of a partnership a principal activity of which is the buying and selling of commodities or options, futures, or forwards with respect to commodities, income and gains from investments therein. Such an MLP will be able to qualify as a QPTP if it derives less than 90% of its annual gross income from the income mentioned in clause (a). All the net income of the QPTPs in which the Fund invests (regardless of source) will be Qualifying Income for the Fund. If the Fund invests in an MLP that is not a QPTP, including a company principally engaged in the real estate industry that is classified for federal tax purposes as a partnership (and not as a corporation or REIT), the net income the Fund earns therefrom would be treated as Qualifying Income only to the extent it would be Qualifying Income if realized directly by the Fund in the same manner as realized by the MLP.

## **G. Foreign Income Tax**

Investment income received by the Fund from sources within foreign countries and U.S. possessions and gains that the Fund realizes on the disposition of foreign securities (collectively, "foreign source income") may be subject to foreign or possession income or other taxes withheld at the source (collectively, "foreign taxes"). The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of foreign taxes imposed by, or exemption from taxes on foreign source income derived from, the particular country. It is impossible to know the effective rate of foreign tax in advance, since the amount of the Fund's assets to be invested within various countries will vary.

If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible and intends to file an election with the IRS to pass through to its shareholders the amount of foreign taxes it paid, as it has in the past. However, there can be no assurance that the Fund will be able to do so for the current or future taxable years. Pursuant to this election, each shareholder of the Fund (1) would be required to (a) include in gross income (in addition to dividends actually received) his or her pro rata share of foreign taxes paid by the Fund, (b) treat that share as having been paid by the shareholder, and (c) treat that share of those taxes and any dividend the Fund paid that represents foreign source income as the shareholder's own income therefrom and (2) could either use the foregoing information in calculating the foreign tax credit against the shareholder's federal income tax or deduct that share in computing taxable income.

A shareholder may be subject to rules that limit or reduce the ability to claim a credit for, or to fully deduct, his or her pro rata share of foreign taxes. Individual shareholders who have no more than \$300 (\$600 for married persons filing jointly) of creditable foreign taxes included on IRS Forms 1099 and all of whose foreign source income is "qualified passive income" may elect each taxable year to be exempt from the extremely complicated foreign tax credit limitation for federal income tax purposes (about which shareholders may wish to consult their tax advisors), in which event they would be able to claim a foreign tax credit without having to file the detailed Form 1116 that otherwise is required. A shareholder will not be entitled to credit or deduct his or her pro rata share of foreign taxes the Fund paid if the shareholder has not held the Fund's shares for at least 16 days during the 31-day period beginning 15 days before the ex-distribution date for those shares. The minimum holding period will be extended if the shareholder's risk of loss with respect to those shares is reduced by reason of holding an offsetting position. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. A foreign shareholder may not deduct or claim a credit for foreign taxes in determining his or her federal income tax liability unless the Fund dividends paid to him or her are "effectively connected" with the shareholder's conduct of a U.S. trade or business.

## **H. Capital Loss Carryovers ("CLCOs")**

The Fund may have capital loss carryovers ("CLCOs") for a taxable year. CLCOs may be used to offset any current taxable year net realized capital gain (whether short-term or long-term) and will not expire. All CLCOs are listed in the Fund's financial statements. Any such losses may not be carried back.

## **I. State and Local Taxes**

The tax rules of the various states and their local jurisdictions with respect to an investment in the Fund may differ from the federal income tax rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

### A. The Trust and its Shareholders

**General Information.** The Fund is a separate series of the Trust. The Trust is an open-end investment management company organized under Delaware law as a statutory trust on August 29, 1995. On January 5, 1996, the Trust succeeded to the assets and liabilities of Forum Funds, Inc. The Trust's trust instrument (the "Trust Instrument") permits the Trust to offer separate series ("funds") of shares of beneficial interest ("shares"). The Trust reserves the right to create and issue shares of additional funds. The Trust and each fund will continue indefinitely until terminated. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund and all assets of such fund belong solely to that fund and would be subject to liabilities related thereto. The other funds of the Trust are described in one or more separate Statements of Additional Information.

**Shareholder Voting and Other Rights.** Each share of a fund and each class of shares represent equal proportionate interests in the assets of that Fund only and have equal dividend, distribution, liquidation and voting rights, except that expenses related to the distribution of shares of each fund or class (and certain other expenses such as transfer agency, shareholder service and administration expenses) are borne solely by such class. Fractional shares have those rights proportionately. Each fund or class votes separately with respect to the provisions of any Rule 12b-1 plan that pertains to the fund or class and other matters for which separate fund or class voting is appropriate under applicable law. Generally, shares will be voted separately by each fund except if: (1) the 1940 Act requires shares to be voted in the aggregate and not by individual funds; or (2) the Board determines that the matter affects more than one fund and all affected funds must vote. The Board may also determine that a matter only affects certain funds or classes of the Trust and thus that only those funds or classes are entitled to vote on the matter. Delaware law does not require the Trust to hold annual meetings of shareholders, and it is anticipated that shareholder meetings will be held only when specifically required by federal or state law. There are no conversion or preemptive rights in connection with shares of the Trust.

All shares, when issued in accordance with the terms of the offering, will be fully paid and non-assessable.

A shareholder in a fund is entitled to the shareholder's pro rata share of all distributions arising from that fund's assets and, upon redeeming shares, will receive the portion of the fund's net assets represented by the redeemed shares.

Shareholders representing 10% or more of the Trust's (or a fund's) shares may, as set forth in the Trust Instrument, call meetings of the Trust (or fund) for any purpose related to the Trust (or fund), including, in the case of a meeting of the Trust, the purpose of voting on removal of one or more Trustees.

Pursuant to Delaware law, the Trust Instrument places certain limitations on the ability of shareholders to bring derivative actions on behalf of the Trust and certain direct claims. These limitations include, but are not limited to: (i) a pre-suit demand must be made on the Board; (ii) to the maximum extent permitted by law, the demand must be executed by at least three unaffiliated and unrelated shareholders who hold shares representing 10% or more of the all shares issued and outstanding or of the series or classes to which such an action relates, if it does not relate to all series and classes thereof; (iii) the Trustees will consider such a request within a time frame that the Trustees in their discretion consider reasonable and appropriate; (iv) the Trustees will be entitled to retain counsel or other advisers in considering the merits of the request and, to the maximum extent permitted by law, will require an undertaking by the shareholder (or shareholders) making the request to reimburse the Trust for the expense of any such advisers in the event that the Trustees determine not to bring the action; (v) to the maximum extent permitted by law, any decision by the Trustees relating to the matter will be final and binding upon the shareholder, and judicially unreviewable; (vi) to the maximum extent permitted by law, a shareholder may bring a direct action or claim only if the shareholder (or group of shareholders) has suffered an injury distinct from that suffered by shareholders of the Trust or the relevant series or a class thereof generally; and (vii) to the maximum extent permitted by law, a shareholder may bring a direct action or claim predicated upon an express or implied right of action under the Trust Instrument or the 1940 Act (excepting rights of action permitted under Section 36(b) of the 1940 Act), only if the shareholder (or group of shareholders) has obtained authorization from the Trustees to bring the action or claim.

The Trust Instrument also places limitations on the forum in which claims against the Trust may be heard. Unless the Board consents in writing to the selection of an alternative forum, any suit, action or proceeding brought by or in the right of any shareholder or any person claiming any interest in any shares seeking to enforce any provision of, or based on any matter arising out of, related to or in connection with the Trust Instrument, including without limitation any claim of any nature against the Trust, any series or class, the Trustees or officers of the Trust, or a service provider will be brought exclusively in the Delaware Court of Chancery to the extent that court has subject matter jurisdiction over the action or claims asserted and otherwise in the courts of the State of Delaware to the extent there is subject matter jurisdiction in those courts for the

claims asserted. Accordingly, shareholders may have to bring suit in what they may consider to be an inconvenient and potentially less favorable forum. These limitations described above relating to derivative actions and choice of forum do not apply to claims asserted under the federal securities laws, to the extent that any such federal laws, rules or regulations do not permit such application.

**Termination or Reorganization of Trust or its Series.** The Board, may, without prior shareholder approval, change the form of organization of the Trust by merger, consolidation or incorporation, so long as the surviving entity is an open-end management investment company. Under the Trust Instrument, the Trustees may also, without shareholder vote, sell and convey all or substantially all of the assets of the Trust to another trust, partnership, association or corporation, or cause the Trust to incorporate in the State of Delaware, so long as the surviving entity is an open-end management investment company that will succeed to or assume the Trust's registration statement.

Under the Trust Instrument, the Board may sell or convey the assets of a fund or reorganize such fund into another investment company registered under the 1940 Act without a shareholder vote.

## **B. Fund Ownership**

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is a shareholder who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund.

As of April 4, 2025, the Trustees and officers of the Trust in aggregate owned less than 1% of the outstanding shares of beneficial interest of the Fund.

As of April 4, 2025, certain shareholders listed in Table 6 in Appendix B owned of record or beneficially 5% or more of the shares of the Fund.

As of April 4, 2025, no shareholder owned of record or beneficially 25% or more of the Fund's voting securities.

## **C. Limitations on Shareholders' and Trustees' Liability**

Delaware law provides that Fund shareholders are entitled to the same limitations of personal liability extended to stockholders of private corporations for profit and, the Trust Instrument contains an express disclaimer of shareholder liability for the debts, liabilities, obligations and expenses of the Trust. Further, for payment of any claim against the Trust or a Fund, a party may only look to the assets of, respectively, the Trust or the Fund.

Accordingly, the Trust Instrument, among other things, provides for indemnification out of a fund's property of any shareholder held personally liable for the obligations of the Fund. The Trust Instrument also provides that the Trust, on behalf of a fund, shall, upon request, assume the defense of any claim made against any shareholder for any act or obligation of that fund. Thus, the risk of a shareholder incurring financial loss as a result of being a shareholder is limited.

The liability of Trustees is similarly limited. The Trust Instrument provides that the Trustees shall not be liable provided that a Trustee is not protected against any liability to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

Shareholders are not intended to be third-party beneficiaries of Fund contracts, and the Trust Instrument establishes certain procedures and limitations regarding shareholder lawsuits brought on behalf of the Trust, which are described above in "Shareholder Voting and Other Rights."

## **D. Proxy Voting Procedures**

The Trust's and the Adviser's proxy voting procedures are included in Appendices C and D, respectively.

Information regarding how the Fund voted proxies relating to portfolio securities during the 12-month period ended June 30 is available: (1) without charge, upon request, by contacting the Transfer Agent at (888) 263-5594 (toll free); and (2) on the SEC's website at [www.sec.gov](http://www.sec.gov).

## **E. Code of Ethics**

The Trust and the Adviser have each adopted a code of ethics under Rule 17j-1 of the 1940 Act. These codes are designed to eliminate conflicts of interest between the Fund and personnel of the Trust and the Adviser. The codes permit such personnel to invest in securities, including securities that may be purchased or held by the Fund, subject to certain limitations. The Distributor relies on the principal underwriters exception under Rule 17j-1(c)(3), specifically where the Distributor is not affiliated with the Trust or the Adviser, and no officer, director or general partner of the Distributor serves as an officer, director or general partner of the Trust or the Adviser.

## **F. Registration Statement**

This SAI and the Prospectus do not contain all of the information included in the Trust's registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, may be examined at the office of the SEC in Washington, D.C. The SEC maintains a website ([www.sec.gov](http://www.sec.gov)) that contains this SAI, any material incorporated by reference, and other information regarding the Fund.

## **G. Financial Statements**

The Fund's Financial Statements and Financial Highlights for the fiscal year ended December 31, 2024 are incorporated into this SAI by reference to the Fund's Annual Report to shareholders. The Fund's Financial Statements and Financial Highlights have been audited by Cohen & Company, Ltd., an independent registered public accounting firm.

### Corporate and Municipal Long-Term Bond Ratings

#### Standard & Poor's ("S&P") Corporate and Municipal Long-Term Bond Ratings:

The following descriptions of S&P's long-term corporate and municipal bond ratings have been published by S&P Global Ratings.

**AAA** - An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

**AA** - An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

**A** - An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

**BBB** - An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

**BB, B, CCC, CC, and C** - Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

**BB** - An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.

**B** - An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

**CCC** - An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

**CC** - An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

**C** - An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

**D** - An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to 'D' if it is subject to a distressed debt restructuring.

**Plus (+) or Minus (-)** - The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

**NR** - This indicates that a rating has not been assigned or is no longer assigned.

### Moody's Investors Service, Inc. ("Moody's") Long-Term Corporate Bond Ratings:

The following descriptions of Moody's long-term corporate bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

**Aaa** - Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

**Aa** - Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

**A** - Obligations rated A are considered upper-medium grade and are subject to low credit risk.

**Baa** - Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

**Ba** - Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

**B** - Obligations rated B are considered speculative and are subject to high credit risk.

**Caa** - Obligations rated Caa are judged to be speculative, of poor standing and are subject to very high credit risk.

**Ca** - Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

**C** - Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

### Moody's U.S. Municipal Long-Term Bond Ratings:

The following descriptions of Moody's long-term municipal bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

**Aaa** - Issuers or issues rated Aaa demonstrate the strongest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Aa** - Issuers or issues rated Aa demonstrate very strong creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**A** - Issuers or issues rated A present above-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Baa** - Issuers or issues rated Baa represent average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Ba** - Issuers or issues rated Ba demonstrate below-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**B** - Issuers or issues rated B demonstrate weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Caa** - Issuers or issues rated Caa demonstrate very weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Ca** - Issuers or issues rated Ca demonstrate extremely weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**C** - Issuers or issues rated C demonstrate the weakest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating category from Aa through Caa. The modifier 1 indicates that the issuer or obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

#### Fitch Ratings Ltd. ("Fitch") Corporate Bond Ratings:

The following descriptions of Fitch's long-term corporate bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

**AAA** - Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA** - Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A** - High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB** - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

**BB** - Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

**B** - Highly speculative. 'B' ratings indicate that material credit risk is present.

**CCC** - Substantial credit risk. 'CCC' ratings indicate that substantial credit risk present.

**CC** - Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk.

**C** - Exceptionally high levels of credit risk. 'C' indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'CCC' to 'C' rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

**Plus (+) or Minus (-)** The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' obligation rating category, or to corporate finance obligation ratings in the categories below 'CCC'.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms "investment grade" and "speculative grade" are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. "Investment grade" categories indicate relatively low to moderate credit risk, while ratings in the "speculative" categories signal either a higher level of credit risk or that a default already occurred.

### Fitch's Municipal Bond Long-Term Ratings:

The following descriptions of Fitch's long-term municipal bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

**AAA** - Highest credit quality. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA** - Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A** - High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB** - Good credit quality. 'BBB' ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

**BB** - Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time.

**B** - Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

**CCC** - Substantial credit risk. 'CCC' ratings indicate that there is a very low margin for safety, and that default is a real possibility.

**CC** - Very high levels of credit risk. 'CC' ratings indicate default of some kind appears probable.

**C** - Exceptionally high levels of credit risk. 'C' ratings indicate default appears imminent or inevitable.

**D** - Default. 'D' ratings indicate a default. Default generally is defined as one of the following:

- failure to make payment of principal and/or interest under the contractual terms of the rated obligation;
- the bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of the business of an issuer/obligor where payment default on an obligation is a virtual certainty; or
- distressed exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation to avoid a probable payment default.

**Plus (+) or Minus (-)** - The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-Term Rating category, or to Long-Term Rating categories below 'CCC'.

### **Municipal Short-Term Bond Ratings**

#### S&P's Municipal Short-Term Bond Ratings:

The following descriptions of S&P's short-term municipal ratings have been published by Standard & Poor's Financial Service LLC.

**SP-1** - Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

**SP-2** - Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

**SP-3** - Speculative capacity to pay principal and interest.

**D** - 'D' is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody's Municipal Short-Term Ratings:

The following descriptions of Moody's short-term municipal ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

**MIG 1** - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

**MIG 2** - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

**MIG 3** - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

**SG** - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch's Municipal Short-Term Credit Ratings:

The following descriptions of Fitch's municipal short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

**F1** - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

**F2** - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3** - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B** - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C** - High short-term default risk. Default is a real possibility.

**RD** - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

**D** - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

**Short-Term Credit Ratings**

S&P's Short-Term Credit Ratings:

The following descriptions of S&P's short-term credit ratings have been published by Standard & Poor's Financial Service LLC.

**A-1** - A short-term obligation rated 'A-1' is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.

**A-2** - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.

**A-3** - A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.

**B** - A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.

**C** - A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

**D** - A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed debt restructuring.

**Dual Ratings** – Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

#### Moody's Short-Term Ratings:

The following descriptions of Moody's short-term credit ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

**P-1** – Ratings of Prime-1 reflect a superior ability to repay short-term debt obligations.

**P-2** – Ratings of Prime-2 reflect a strong ability to repay short-term debt obligations.

**P-3** – Ratings of Prime-3 reflect an acceptable ability to repay short-term obligations.

**NP** - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

#### Fitch's Short-Term Ratings:

The following descriptions of Fitch's short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

**F1** - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

**F2** - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3** - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B** - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C** - High short-term default risk. Default is a real possibility.

**RD** - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

**D** - Default. Indicates a broad-based default event for an entity, or the default of a specific short-term obligation.

**APPENDIX B – MISCELLANEOUS TABLES****Table 1 – Investment Advisory Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived and/or expenses reimbursed by the Adviser, if any, and the actual fees retained by the Adviser. The data are for the last three fiscal years.

<b>Year Ended</b>	<b>Advisory Fees Accrued</b>	<b>Advisory Fees Waived and/ or Expenses Reimbursed</b>	<b>Advisory Fees Received</b>
December 31, 2024	\$4,276,530	\$917,003	\$3,359,527
December 31, 2023	\$3,957,280	\$850,489	\$3,106,791
December 31, 2022	\$4,172,339	\$954,764	\$3,217,575

**Table 2 – Administration Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived by Apex Fund Services, if any, and the actual fees retained by Apex Fund Services. The data are for the last three fiscal years.

<b>Year Ended</b>	<b>Administration Fees Accrued</b>	<b>Administration Fees Waived</b>	<b>Administration Fees Received</b>
December 31, 2024	\$393,304	\$52,500	\$340,804
December 31, 2023	\$377,403	\$52,500	\$324,903
December 31, 2022	\$388,100	\$52,500	\$335,600

**Table 3 – Commissions**

The following table shows the aggregate brokerage commissions of the Fund. The data are for the last three fiscal years.

<b>Year Ended</b>	<b>Aggregate Brokerage Commissions (\$) Paid</b>	<b>Total Brokerage Commissions (\$) Paid to Affiliate of Fund, Adviser or Distributor</b>	<b>% of Brokerage Commissions Paid to Affiliate of Fund, Adviser or Distributor</b>	<b>% of Transactions Executed by Affiliate of Fund, Adviser or Distributor</b>
December 31, 2024	\$133,217	\$0	0%	0%
December 31, 2023	\$100,214	\$0	0%	0%
December 31, 2022	\$159,985	\$0	0%	0%

**Table 4 – Directed Brokerage**

The following table lists the Fund's directed brokerage in return for research services, the amount of transactions so directed and the amount of commissions generated therefrom. The data are for the fiscal year ended December 31, 2024.

<b>Amount Directed</b>	<b>Amount of Commissions Generated</b>
None	None

**Table 5 – Securities of Regular Brokers or Dealers**

The following table lists the Fund's regular brokers-dealers whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund's holdings of those securities as of December 31, 2024.

<b>Regular Broker or Dealer</b>	<b>Value of Securities Held</b>
None	N/A

**Table 6 – 5% Shareholders**

The following table lists, as of April 4, 2025, (1) the persons who owned 25% or more of the outstanding shares of the applicable class, and (2) the persons who owned of record or beneficially 5% or more of the outstanding shares of the Fund. The Fund believes that these shares were owned of record by such shareholders for their fiduciary, agency or custody accounts.

**Forum Funds  
Shareholder Voting Policy**

**As of December 14, 2012**

**SECTION 1. BACKGROUND**

The Trust exercises its shareholder voting responsibilities as an investor in other issuers as a fiduciary, with the goal of maximizing the value of the Trust's and its shareholders' investments. This Policy details the Trust's policy with respect to shareholder voting.

**SECTION 2. ADVISER RESPONSIBILITIES**

(A) Delegation by Board. Each Fund has delegated to the Adviser the authority to vote as a shareholder of issuers whose securities are held in its portfolio. The Adviser shall maintain and the Board shall approve voting procedures related to the Adviser acting on behalf of the Fund in accordance with its fiduciary duties and the best interests of Fund shareholders.

(B) Delivery of Proxies. The Adviser is responsible for coordinating the delivery of proxies to be voted by the Custodian to the Adviser or to an agent of the Adviser selected by the Adviser to vote proxies with respect to which the Adviser has such discretion (a "Proxy Voting Service"). Upon request, the Adviser shall provide periodic reports to the Board as to the implementation and operation of its shareholder voting policies and procedures as they relate to the Trust.

(C) Conflicts of Interest. The Trust recognizes that under certain circumstances an Adviser or Proxy Voting Service may have a conflict of interest in voting on behalf of a Fund. A conflict of interest includes any circumstance when the Fund, the Adviser, the Distributor, the Proxy Voting Service or one or more of their Affiliated Persons (including officers, directors and employees) knowingly does business with, receives compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of Fund shareholders in how shares of that issuer are voted.

Each Adviser is responsible for maintaining procedures to identify and address material conflicts of interest and, when applicable, determine the adequacy of a Proxy Voting Service's procedures to identify and address material conflicts of interest.

(D) Voting Record. The Adviser shall be responsible for ensuring a voting record is maintained that includes all instances where the Fund was entitled to vote and will coordinate the annual delivery of such record to the Administrator for purposes of preparing the Trust's annual Form N-PX filing. The voting record shall include the following information required to be reported in Form N-PX:

- (1) The name of the issuer of the security;
- (2) The exchange ticker symbol of the security;
- (3) The CUSIP for the security;
- (4) The shareholder meeting date;
- (5) A brief identification of the matter voted on;
- (6) Whether the matter was proposed by the issuer or by a security holder;
- (7) Whether the Trust cast its vote on the matter;
- (8) How the Trust cast its vote (*e.g.*, for or against proposal, or abstain; for or withhold regarding election of directors); and
- (9) Whether the Trust cast its vote for or against management.

The Adviser shall also be responsible for ensuring information regarding how the Fund voted relating to portfolio securities during the twelve-month period ended June 30 is available on the Fund's website or other location consistent with disclosure in the Fund's registration statement.

### **SECTION 3: ABSTENTION**

The Trust and an Adviser may abstain from shareholder voting in certain circumstances. Abstaining from voting may be appropriate if voting would be unduly burdensome or expensive, or otherwise not in the best interest of a Fund's shareholders.

### **SECTION 4: BOARD REPORTING AND REVIEW**

(A) The Adviser shall submit its voting procedures to the Board for review and approval initially and at the next regularly scheduled meeting of the Board following any material change.

(B) The Adviser shall report to the Board, at least quarterly, whether any conflicts of interest arose while voting as an investor in other issuers and how such conflicts were handled.

**Polaris Capital Management, LLC  
Proxy Voting Policies and Procedures  
Regarding Polaris Global Value Fund  
2023**

Polaris Capital Management, LLC’s (the “Adviser”) policy regarding the voting of proxies consists of (1) the statement of the law and policy, (2) identification of the person(s) responsible for implementing this policy, and (3) the procedures adopted by the Adviser to implement the policy.

**1. Statement of Law and Policy**

**A. Law**

Because a registered investment company (“fund”) is the beneficial owner of its portfolio securities, it has the right to vote proxies relative to its portfolio securities. The Securities and Exchange Commission has stated that a fund’s board has the obligation to vote proxies. As a practical matter, fund boards typically delegate this function to the fund’s adviser/sub-adviser.

Rule 206(4)-6 under the Investment Advisers Act of 1940 requires that a registered investment adviser with proxy voting authority generally must satisfy the following four requirements: (i) adopt and implement written proxy voting policies and procedures reasonably designed to ensure the adviser votes client and fund securities in the best interests of clients and fund investors and addressing how conflicts of interest are handled; (ii) disclose its proxy voting policies and procedures to clients and fund investors and furnish clients and fund investors with a copy if they request it; (iii) inform clients and fund investors as to how they can obtain information from the adviser on how their securities were voted; and (iv) retain certain records.

**B. Policy**

The Adviser will vote proxies delivered to it by the fund’s custodian in accordance with this proxy policy. The vote will be cast in such a manner, which, in the Adviser’s judgment, will be in the best interests of shareholders. The Adviser contracts with Boston Investor Services, Inc. for the processing of proxies.

The Adviser, through its investment personnel, will generally comply with the following guidelines:

- **Routine Corporate Governance Issues**

The Adviser will vote in favor of management. Routine issues may include, but not be limited to, election of directors, appointment of auditors, changes in state of incorporation or capital structure. In certain cases the Adviser will vote in accordance with the guidelines of specific clients.

- **Non-routine Corporate Governance Issues**

The Adviser will vote in favor of management unless voting with management would limit shareholder rights or have a negative impact on shareholder value. Non-routine issues may include, but not be limited to, corporate restructuring/mergers and acquisitions, proposals affecting shareholder rights, anti-takeover issues, executive compensation, and social and political issues. In cases where the number of shares in all stock option plans exceeds 10% of basic shares outstanding, the Adviser generally votes against proposals that will increase shareholder dilution. In general the Adviser will vote against management regarding any proposal that allows management to issue shares during a hostile takeover.

- **Non-Voting of Proxies**

The Adviser may not vote proxies if voting may be burdensome or expensive, if voting may reduce the shareholder’s liquidity, or otherwise not in the best interest of clients.

- **Conflicts of Interest**

Should the Adviser have a conflict of interest with regard to voting a proxy, the Adviser will disclose such conflict to the client and obtain client direction as to how to vote the proxy.

- **Record Keeping**

The following records will be kept for each client:

- Copies of the Adviser's proxy voting policies and procedures.
- Copies of all proxy statements received.
- A record of each vote the Adviser casts on behalf of the client along with any notes or documents that were material to making a decision on how to vote a proxy including an abstention on behalf of a client, including the resolution of any conflict.
- A copy of each written client request for information on how the Adviser voted proxies on behalf of the client and a copy of any written response by the Adviser.

- **Reporting**

- To comply with Rule 14Ad-1 of the Securities Exchange Act of 1934, the Adviser will report the required voting records relating to executive compensation matters on Form N-PX.

This proxy policy will be distributed to all clients of the Adviser and added to Part II of Form ADV. A hard copy of the policy will be included in the Compliance Program and is available on request.

## **2. Who is Responsible for Implementing this Policy?**

The Compliance Officer is responsible for implementing, monitoring and updating this policy, including reviewing decisions made on non-routine issues and potential conflicts of interest. The Compliance Officer is also responsible for maintaining copies of all records and backup documentation in accordance with applicable record keeping requirements. The Compliance Officer can delegate in writing any of his or her responsibilities under this policy to another person.

## **3. Procedures to Implement this Policy**

### **Conflicts of Interest**

From time to time, proxy voting proposals may raise conflicts between the interests of the Advisers' clients and the interests of the Adviser, its employees, or its affiliates. The Adviser must take certain steps designed to ensure, and must be able to demonstrate that those steps resulted in, a decision to vote the proxies that was based on the clients' best interest and was not the product of the conflict. For example, conflicts of interest may arise when:

- A proponent of a proxy proposal has a business relationship with the Adviser or its affiliates;
- The Adviser or its affiliates have business relationships with participants in proxy contests, corporate directors, or director candidates;
- An Adviser employee has a personal interest in the outcome of a particular matter before shareholders; or
- An Adviser employee has a business or personal relationship with participants in proxy contests, corporate directors or director candidates.

The Investment Personnel of the Adviser are responsible for identifying proxy voting proposals that present a conflict of interest. If the Adviser receives a proxy relating to an issuer that raises a conflict of interest, the Compliance Officer along with the Adviser shall determine whether the conflict is "material" to any specific proposal included within the proxy. The Compliance Officer will determine whether a proposal is material as follows:

- Routine Proxy Proposals – Proxy proposals that are "routine" shall be presumed not to involve a material conflict of interest for the Adviser, unless the Compliance Officer has actual knowledge that a routine

proposal should be treated differently. For this purpose, “routine” proposals would typically include matters such as uncontested election of directors, meeting formalities, and approval of an annual report/financial statements.

- Non-Routine Proxy Proposals – Proxy proposals that are “non-routine” will be presumed to involve a material conflict of interest, unless the Compliance Officer determines that the Adviser does not have such a conflict of interest. For this purpose, “non-routine” proposals would typically include any contested matter, including a contested election of directors, a merger or sale of substantial assets, a change in the articles of incorporation that materially affects the rights of shareholders, and compensation matters for management (e.g., stock option plans, retirement plans, profit sharing, or other special remuneration plans). The Adviser and the Compliance Officer will determine on a case-by-case basis that particular non-routine proposals do not involve a material conflict of interest, the Compliance Officer will consider whether the Adviser or any of its officers, directors, employees, or affiliates may have a business or personal relationship with a participant in a proxy contest, the issuer itself or the issuer’s pension plan, corporate directors, or candidates for directorships.
- Any decision to override a vote due to a conflict of interest will be made by the Investment Personnel and reported to the CCO.
- The Compliance Officer will record in writing the basis for any such determination.
