PERFORMANCE AS OF JUNE 30, 2026 (Total Return)

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. For the most recent month end performance, please call (888) 263-5594. Shares redeemed or exchanged within 180 days of purchase will be charged a 1.00% fee. Fund returns for periods less than 180 days do not reflect this fee; otherwise, if reflected this return would have been lower. Returns greater than one year are annualized.

HYPOTHETICAL GROWTH OF \$10,000 7/31/89-6/30/26

Growth of a hypothetical \$10,000 investment compared to the MSCI World Index

Past performance is no guarantee of future results. Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.

PERFORMANCE COMMENTARY

Global equities delivered a very strong second quarter; the MSCI World Index returned 13.76%, while the Polaris Global Value Fund gained 13.60% (net of fees). Outsized IT gains drove performance, followed by financials, healthcare, and industrials. Consumer staples and energy lagged. From a country perspective, off-benchmark holdings in South Korea contributed most to gains, followed by notable outperformance in the United Kingdom, Ireland and a handful of other regions. A few laggard stocks in China, Norway, Switzerland and the Netherlands hampered results.

In IT, SK hynix and Samsung Electronics were standout performers, riding demand for commodity and high bandwidth memory (HBM) chips. In financials, Orix Corp. continued to deliver under its new CEO, selling Orix Bank to Daiwa Securities for ~\$2.3 billion, funding a buyback and raising FY2027 profit guidance. Popular Inc. rose on higher earnings expectations and a more supportive local rate outlook. Five health care holdings posting double digit gains. Lantheus Holdings Inc. advanced on multiple fronts — strong quarterly earnings, the FDA approval of PYLARIFY TruVu, and intensified M&A interest. CVS Health Corp. launched a comprehensive GLP-1 program, combining lower-cost access and personalized pharmacist support.

In consumer staples, idiosyncratic events pressured stocks. Barry Callebaut saw relief as cocoa prices cooled, but volumes remained weak. Irish convenience foods producer Greencore Group completed its acquisition of Bakkavor and reported a loss due to one off integration costs. Koninklijke Ahold Delhaize declined on U.S. competitive pressures. In energy, Brent crude traded near \$100 per barrel through the spring, then eased by June as the U.S. and Iran agreed to interim shipping lane terms. Despite the supportive oil backdrop, both ENI SpA and TotalEnergies finished the quarter lower, as investors focused on softer forward price expectations, lingering geopolitical and regulatory risks, and profit taking after strong prior period gains.

This mix of macro risk, rate policy, and concentrated market leadership argues for a constructive but selective outlook, with periods of heightened volatility likely if the Middle East truce frays or inflation stays sticky. The case for value and international equities is increasingly compelling, with non U.S. markets offering more situations where prices diverge meaningfully from underlying fundamentals.

THE POLARIS GLOBAL VALUE FUND is a no-load mutual fund that seeks capital appreciation by investing in value stocks worldwide. The Fund is diversified across country, sector and market capitalization, and typically holds 65 to 100 stocks that meet Polaris' strict value criteria.

Polaris Capital Management, LLC (the "Adviser") uses proprietary investment technology combined with Graham & Dodd style fundamental research to identify potential investments. Filters are applied as part of the investment approach, which attempts to identify a list of companies with the most undervalued streams of sustainable free cash flow or assets worldwide. Polaris then conducts rigorous fundamental research on the companies identified in the screening process, subsequently making selections for Fund investment.

THE INVESTMENT ADVISER

Polaris Capital Management, LLC is a global value equity manager that provides investment services for institutional and individual clients. Polaris' management believes worldwide markets are generally efficient over time, but investor behavior creates volatility that leads to inefficiency somewhere in the world. An integrated global investment strategy may be utilized to help exploit this inefficiency. Polaris believes investing in the most undervalued companies worldwide likely limits risk and has the potential for benchmark-beating returns.

Total return includes reinvestment of dividends and capital gains. During the period some of the Fund's fees were waived or expenses reimbursed. In the absence of these waivers and reimbursements, performance figures would be lower. **The Fund invests in securities of foreign issuers, including issuers located in countries with emerging capital markets. Investments in such securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. Options trading involves risk and is not suitable for all investors.** On June 1, 1998, a limited partnership managed by the Adviser reorganized into the Fund. The predecessor limited partnership maintained an investment objective and investment policies that were, in all material respects, equivalent to those of the Fund. The Fund's performance for periods before June 1, 1998, is that of the limited partnership and includes the expenses of the limited partnership. If the limited partnership's performance had been readjusted to reflect the first year expenses of the Fund, the Fund's performance for the periods prior to June 1, 1998, may have been lower. The limited partnership was not registered under the Investment Company Act of 1940 ("1940 Act") and was not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the Internal Revenue Code, which, if applicable, may have adversely affected its performance.

The MSCI World Index, net dividends reinvested measures the performance of a diverse range of global stock markets in the United States, Canada, Europe, Australia, New Zealand and the Far East. The MSCI World Index is unmanaged and does include the reinvestment of dividends, net of withholding taxes. One cannot invest directly in an index or an average.

The Treynor Measure is a risk-adjusted measure of return that divides a portfolio's return in excess of the riskless return by its beta. Beta is the measure of a fund's relative volatility as compared to an index. A fund with a beta higher than 1 is expected to be more volatile than the applicable index. Alpha is the difference between a fund's actual returns and its expected performance given its level of risk as measured by beta. The Sharpe Ratio is a measure of the risk-adjusted return of an investment.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses.
